

Swachh Survekshan RANKING REPORT

2024-2025

Manohar Lal
Hon'ble Minister
Ministry of Housing and Urban Affairs
Government of India

The year 2024 is historically significant as it marks the tenth anniversary of the Swachh Bharat Abhiyan, a mission that has truly transformed India's sanitation landscape. What began with the foundational goal of constructing toilets has now blossomed from a seed into a fruit-bearing tree. When we speak of 'Swachhata' today, it's far beyond its initial focus on toilets to embrace a truly comprehensive sanitation ecosystem or "Samproona Swachhata". We're now at the forefront of implementing a sophisticated infrastructure that includes a range of modern, sustainable technologies.

Our achievements and ongoing efforts need to be continuously stocked and monitored. This is where the crucial role of the annual Swachh Survekshan survey comes into play. Swachh Survekshan is not merely an annual survey that ranks the cleanliness of cities across India. It is a testament to the improved quality of life for countless people and reflects a new image of India that was unimaginable a decade ago. It signifies a transformation in civic life quality, upholds the dignity of our sanitation workers, and contributes to a proud national image. It has become the biggest festival celebrating "Jan Andolan", where the government, sanitation workers, and civilians collaboratively write the narrative of a 21st-century 'Viksit Bharat'.

This year's Swachh Survekshan 2024 builds upon the theme of "Reduce, Reuse, and Recycle" actively promoting a circular economy. Our vision is to create an economic model that minimizes waste and continuously reuses resources. This philosophy has always been a part of the Indian ethos. We have been taught in our vedic scriptures that humans are custodians, not consumers, of the Earth. We must utilize the resources as per our needs and not greed. These traditions inherently encouraged minimizing consumption (reduce), reusing things until their last breath (reuse), and giving them a second life through recycling. With great pride, I can say that innovation in India, based on these 3R principles is successfully highlighted in this 9th edition of the Survekshan. It also directly addresses the Sustainable Development Goals 11 and 12.

Let us continue our pledge towards 'Swachhata' and keep striving to take our nation to the next level. I congratulate and hail every citizen of the country for continuous dedication and striving towards a 'Swachh Bharat'.

Shri Tokhan Sahu
Hon'ble Minister of State
Ministry of Housing and Urban Affairs
Government of India

Ten years ago, on the birth anniversary of Mahatma Gandhi, India embarked on a journey that would redefine its future. The launch of the Swachh Bharat Mission on October 2nd, 2014, was more than a policy, it was a call to the soul of the nation. It began with a "Whole of Government" approach, but its resounding success lies in how it became "everyone's business."

This has not been an overnight change, it has been a decade of dedicated action. The Swachh Bharat Mission has become a transformative force, touching the lives of people to their very core. We see its impact not just in the more than 12 crore toilets built, but in the subtle, profound shifts in our daily habits. It's in the citizen who now thinks twice before littering, instinctively keeping a wrapper in their pocket until they find a dustbin. It is evident in the vibrant wall paintings that adorn our cities, celebrating cleanliness, and in the source segregation of waste becoming a household habit.

To sustain these monumental efforts, foster a spirit of healthy competition, and celebrate the cities leading the change, Swachh Survekshan was born. It has evolved into the largest urban cleanliness survey in the world, a powerful tool that motivates cities to innovate and deliver the best for their citizens. The sense of competition and the race among Urban Local Bodies to win brings out the best in them, sparking remarkable innovation and the sharing of best practices across the nation.

As we navigate the challenges of the 21st century, we recognize that modern consumption is on the rise, and with it, the daunting challenge of managing ever-growing piles of waste. This year, Swachh Survekshan 2024 directly confronts this reality with the powerful theme of "Reduce, Reuse, and Recycle" (RRR). This theme is not merely a slogan, it represents a strategic pivot towards a circular economy, aiming to make our cities truly sustainable.

A decade ago, we planted a seed. Today, we see a forest growing. The idea of "Swachhata" has swept across the nation, embedding itself in the consciousness of every citizen. As we look towards the future of a Vikasit Bharat, it is clear that when it comes to our collective will, even the sky is not the limit. I am immensely excited to see where our united journey takes us next.

Shri Srinivas R Katikithala
Secretary
Ministry of Housing and Urban Affairs
Government of India

As we embark on the ninth edition of the world's largest annual urban cleanliness survey, Swachh Survekshan, we stand at a pivotal moment. This annual exercise has evolved far beyond a mere ranking system, it has become the cornerstone of the Swachh Bharat Mission 2.0, driving us toward our collective ambition of creating 'Garbage-Free Cities'. It is a testament to our shared commitment that what began as a government program has transformed into a nationwide Jan Andolan.

Now in its ninth iteration, Swachh Survekshan 2024 builds upon the robust foundation of its predecessors while introducing innovative reforms that place inclusivity at their core. This year marks a significant evolution in the survey's design. For the first time, Urban Local Bodies have been classified into five distinct population-based categories ranging from 'Very Small' to 'Million-Plus' cities. This strategic change acknowledges the diverse capacities and unique challenges faced by ULBs across India's vast urban ecosystem, ensuring a more equitable and level playing field for all. To celebrate and further motivate our top performers, a special category, the 'Super Swachh League,' has been introduced to recognize the 12 cities that have consistently demonstrated exceptional performance in the past survekshans.

At its heart, Swachh Survekshan 2024 continues to be anchored in the core principles of data transparency, rigorous third-party validation, and, most importantly, citizen engagement. The assessment indicators have been simplified and thoughtfully structured into ten comprehensive sections, covering the entire spectrum of urban sanitation and cleanliness. This year, we have introduced new indicators to assess the on-ground implementation of sanctioned projects and the transformation of Cleanliness Target Units, ensuring that infrastructure development translates into tangible, clean, and environments for citizens.

Recognizing that a generational shift in mindset is crucial for long-term success, a school-level assessment has been launched for the first time. This initiative aims to integrate the values of Swachhata into the hearts and minds of our youth, empowering them to become lifelong champions of a clean India. With every passing year, Swachh Survekshan tells a remarkable new story of transformation in our cities. It shows us that a clean and healthy environment is no longer a distant dream, but a reality we are building together, day by day.

Roopa Mishra
Joint Secretary
Swachh Bharat Mission Urban
Govt of India

It is with great pride that we reflect on the remarkable journey of Swachh Survekshan. Launched in 2016 with just 73 cities, it has grown into the world's largest urban cleanliness assessment. This evolution is not just about numbers, it represents the unwavering commitment of a nation striving toward cleaner, healthier, and more sustainable cities.

Now in its ninth edition, Swachh Survekshan 2024 marked a defining moment in our pursuit of urban sanitation excellence. This year's assessment covered an unprecedented scale, including 4,589 Urban Local Bodies, 58 Cantonment Boards, and 88 Ganga Towns. Backed by a team of over 4,500 trained assessors, the survey evaluated around 18,500 commercial areas, 26,800 residential areas, around 28,000 community and public toilet facilities on multiple sanitation parameters. Integral to this process was the voice of the people, reflected through more than 14.6 million online citizen feedback responses, making this a truly participatory and democratic initiative.

With a renewed focus on being simpler, sharper, more systematic, and inclusive, the 2024 edition was thoughtfully reimagined to better serve the needs of ULBs and stakeholders. The evaluation framework rested on ten thematic pillars, covering vital aspects such as visible cleanliness, solid and liquid waste management, access to sanitation, and citizen engagement. Focus was also placed on promoting mechanized desludging, the safety and welfare of sanitation workers, and grievance redressal mechanisms.

A standout feature of this year's survey was the launch of the Super Swachh League, a new recognition category honoring the top 12 cities that consistently ranked in the top three over the past three years (2021 to 2023). This league celebrated sustained excellence and set a benchmark for all cities aspiring to transform their urban landscape.

Each year, Swachh Survekshan has grown not only in scale but also in impact. It continues to strengthen the foundation for urban transformation by providing cities with a structured pathway for improvement, supported by data, citizen feedback, and transparent evaluation. The journey towards a cleaner and more sustainable India is ongoing, and with every new edition, we move closer to turning that vision into reality.

Executive Summary

The 9th edition of Swachh Survekshan 2024-2025 marks a bold leap forward, redefining the world's largest urban cleanliness survey. Designed to be simpler, sharper, more systematic, and inclusive, this edition serves as a powerful tool to evaluate and compare sanitation standards across Indian cities, in line with the goals of the Swachh Bharat Mission-Urban 2.0. Since its launch, the program has expanded substantially, growing from an initial coverage of 73 cities to 4,589 cities in 2024. This includes 58 Cantonment Boards and 88 Ganga Towns, reflecting the widespread adoption and reach of the initiative.

At its core, Swachh Survekshan aims to assess the cleanliness levels of cities and the effectiveness of their sanitation initiatives, with a strong emphasis on innovation. Over the years, rising city participation has led to measurable improvements in sanitation outcomes across the country. In this edition, the assessment process was conducted across multiple parameters and implemented in four distinct phases throughout the year. In the final Swachh Survekshan ranking, the marks from the certification were also included. Hence, the final ranking was based on the combined score of the Swachh Survekshan assessment and the certification. This approach enabled a thorough and balanced assessment of city performance, encompassing both infrastructure-related indicators and citizen engagement.

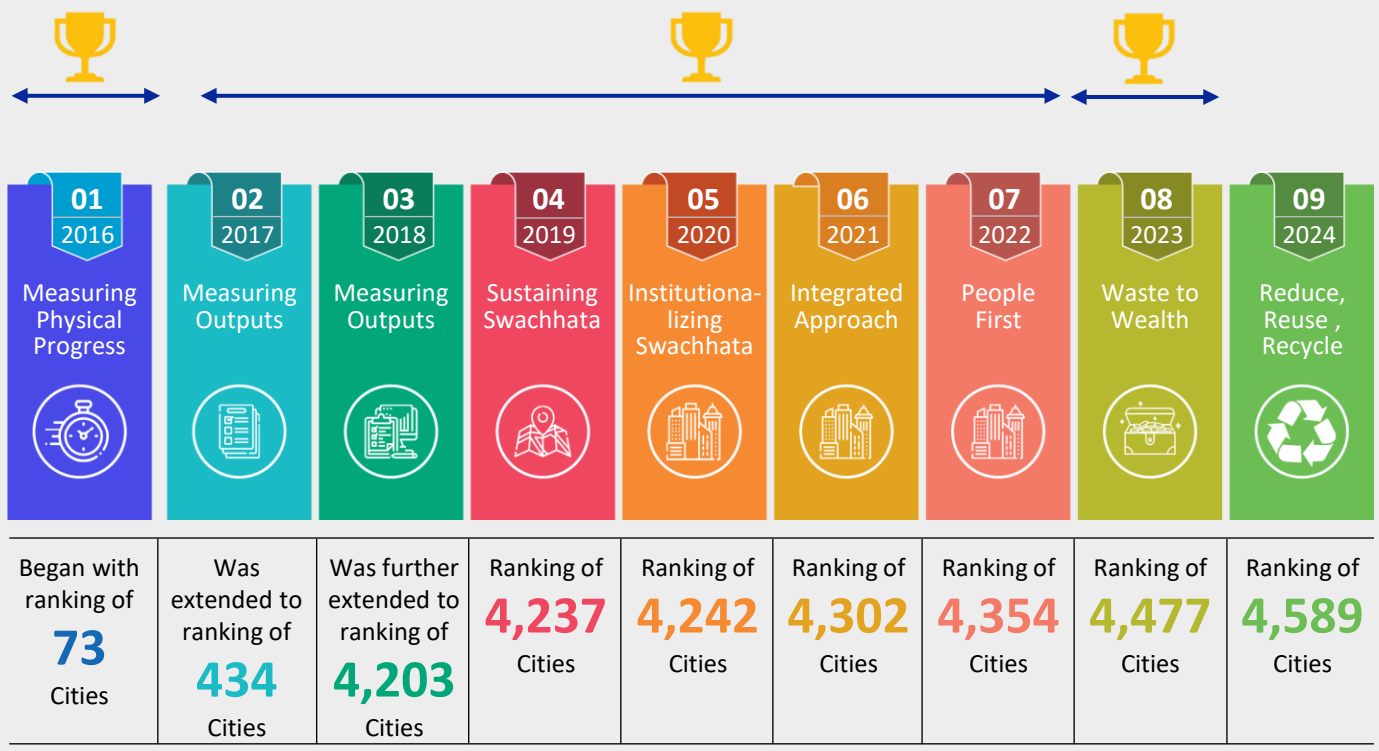

The Swachh Survekshan 2024-2025 was guided by the theme "Reduce, Recycle, and Reuse" emphasizing the importance of circularity in waste management practices. The survey placed a strong focus on innovation, encouraging urban local bodies and stakeholders to develop sustainable and creative solutions to address waste management challenges.

Swachh Survekshan Overview (2016–2025)

Rank 1: Mysuru

Rank 1: Indore

Rank 1: Indore
& Surat

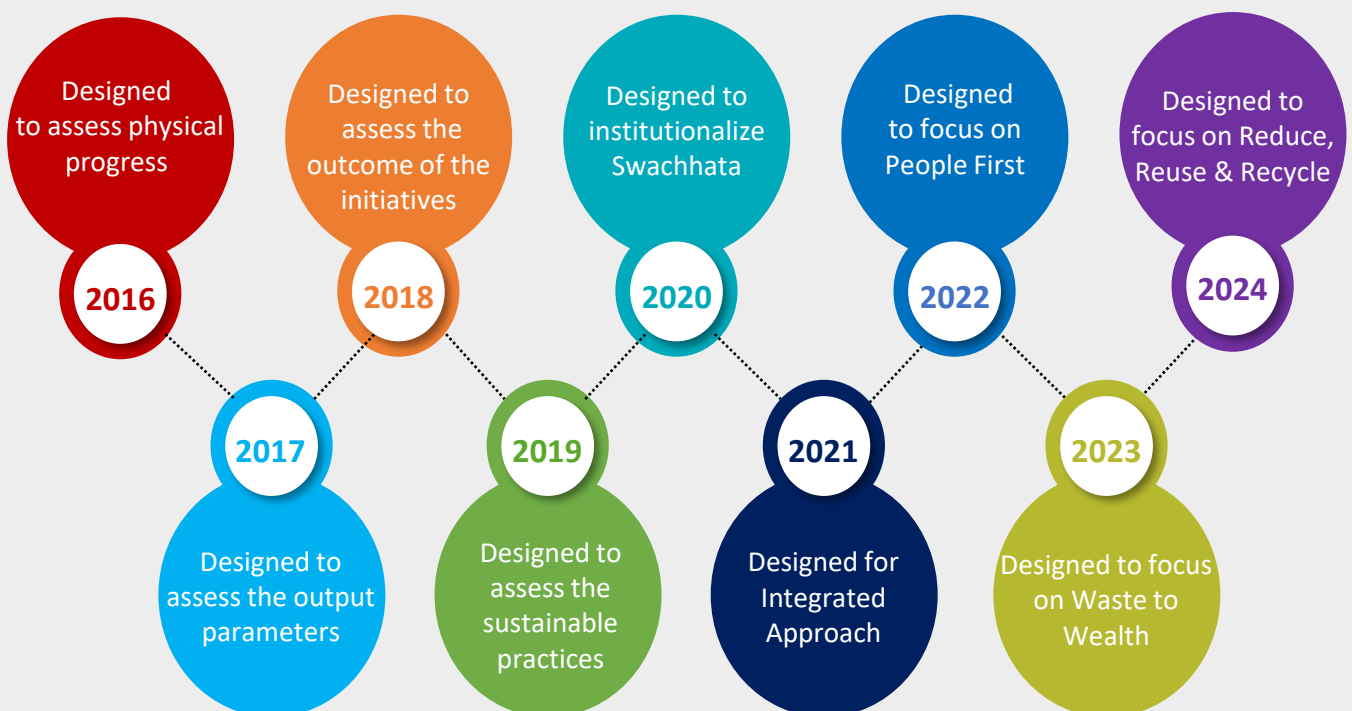

In a significant shift, cities were classified for the first time into five population categories: Very Small Cities (less than 20,000 Population), Small Cities (20,000 - 50,000 Population), Medium Cities (50,000 - 3,00,000 Population), Big Cities (3,00,000 - 10,00,000 Population), and Million-Plus Cities (more than 10,00,000 Population). Each category was assessed using population-specific parameters, making the evaluation more inclusive and context-sensitive. Awards were conferred upon the best-performing cities in each category, providing an opportunity for smaller cities to shine alongside established frontrunners such as Indore and Surat.

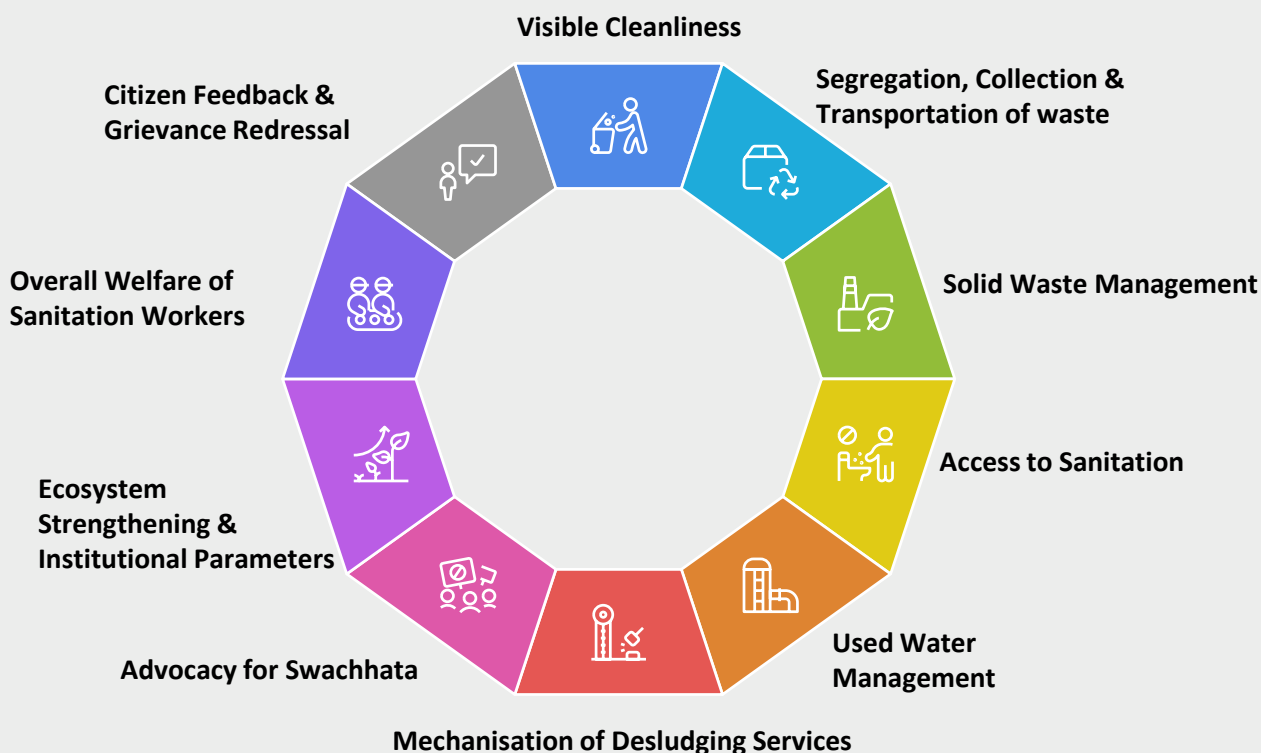

This year's assessment introduced several new elements, including the addition of "Cleanliness Target Units" (CTUs) and the adoption of "Swabhav Swachhata Sanskaar Swachhata," which emphasizes behavior change in daily life. The evaluation focused on key parameters such as the elimination of difficult and dark spots, visible cleanliness, and the establishment of Reduce, Reuse, Recycle (RRR) Centers. To foster the integration of swachhata values in educational institutions and inspire young minds to adopt cleanliness and sustainability, assessments of sanitation infrastructure in schools were added as a component in the current Swachh Survekshan. Additionally, a special focus was placed on visible cleanliness and waste management at high-footfall tourist spots.

This holistic approach enabled a comprehensive evaluation of cleanliness initiatives across urban India, promoting sustainability, community participation, and long-term impact. The competition among cities was based on ten key indicators: 1) Visible Cleanliness; 2) Segregation, Collection, and Transportation of Waste; 3) Solid Waste Management; 4) Access to Sanitation; 5) Used Water Management; 6) Mechanization of Desludging Services; 7) Advocacy for Swachhata; 8) Strengthening of Ecosystem and Institutional Parameters; 9) Overall Welfare of Sanitation Workers; and 10) Citizen Feedback and Grievance Redressal.

Evolution and Focus of Swachh Survekshan

Swachh Survekshan 2024-2025: Key Indicators

An important addition to this year's survey is the introduction of a special category titled the "Super Swachh League." This league features a select group of cities that have consistently demonstrated outstanding performance in previous editions of Swachh Survekshan. The objective of this initiative is to formally recognize their sustained achievements and to inspire other cities to pursue higher standards of cleanliness and sanitation. The entrants are those cities which are ranked in the top three at least once in the last three years and must remain in the top 20% of their respective population category in the current year's Swachh Survekshan Assessment. At present, twenty-three cities have qualified for inclusion in the Super Swachh League. In future editions, these cities will be evaluated against a set of additional aspirational indicators.

Cities in Super Swachh League

Population Size	Cities
Very Small Cities (< 20,000)	Panchgani, Patan, Budni , Panhal , Bishrampur
Small Cities (20,000 – 50,000)	Vita, Sasvad, Deolali Pravara, Dungarpur
Medium Cities (50,000 – 3 Lakh)	Ambikapur, Tirupati, New Delhi Municipal Council , Lonavala
Big Cities (3 – 10 Lakh)	Noida, Chandigarh, Mysore, Guntur, Gandhi Nagar, Ujjain
Million Plus Cities (> 10 Lakh)	Navi Mumbai, Indore, Surat , Vijaywada

Focus Area of Swachh Survekshan 2024-2025

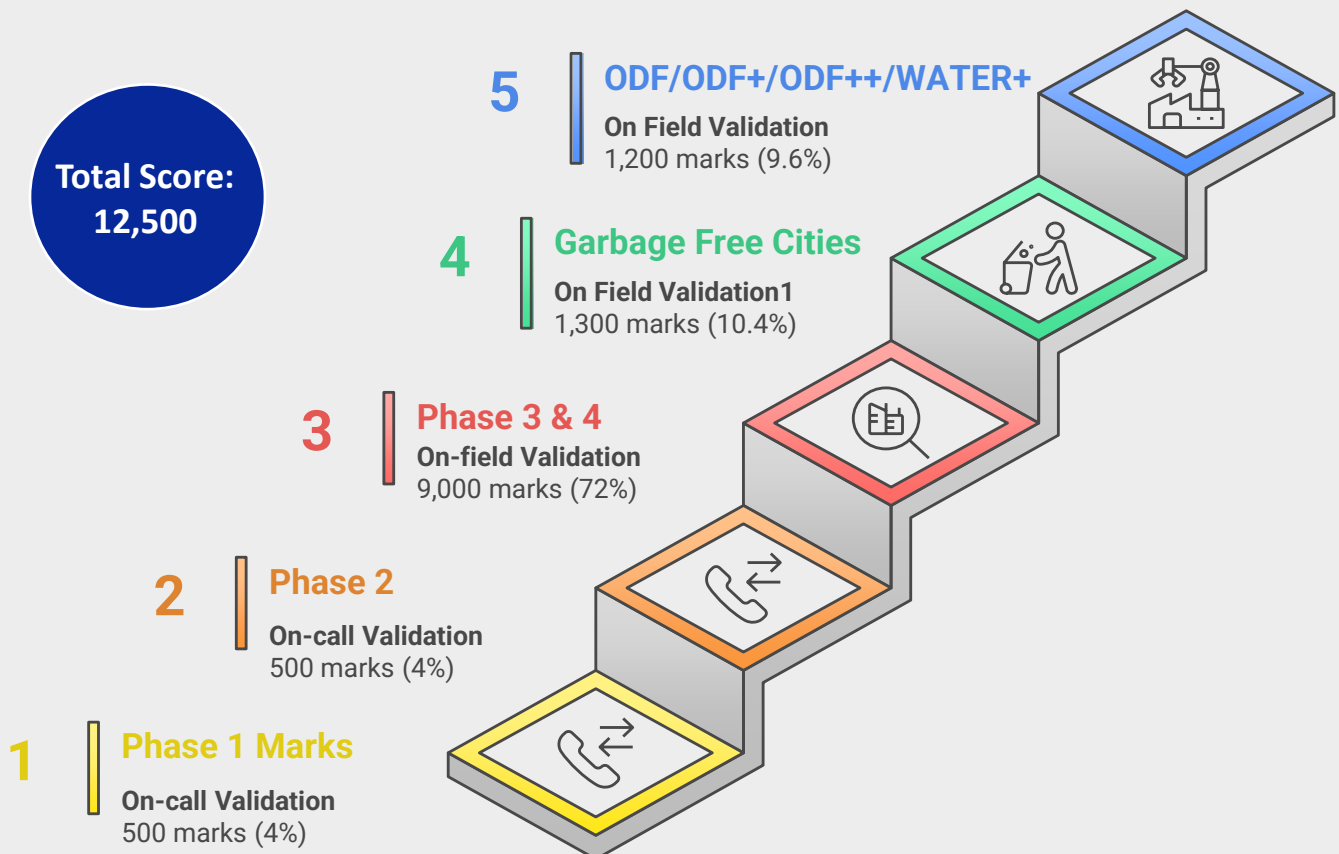

Ranking Methodology

The ranking was done by adding marks from three sources:

- 1** Marks of Phase 1 and 2 (On-call Validation)
- 2** Marks of Phase 3 (On-field survey of BWGs) & Phase 4 (On-field survey of 10 indicators*)
- 3** Marks of Certification: ODF & GFC Star Rating

Swachh Survekshan 2024: Marks Distribution

**Total Score:
12,500**

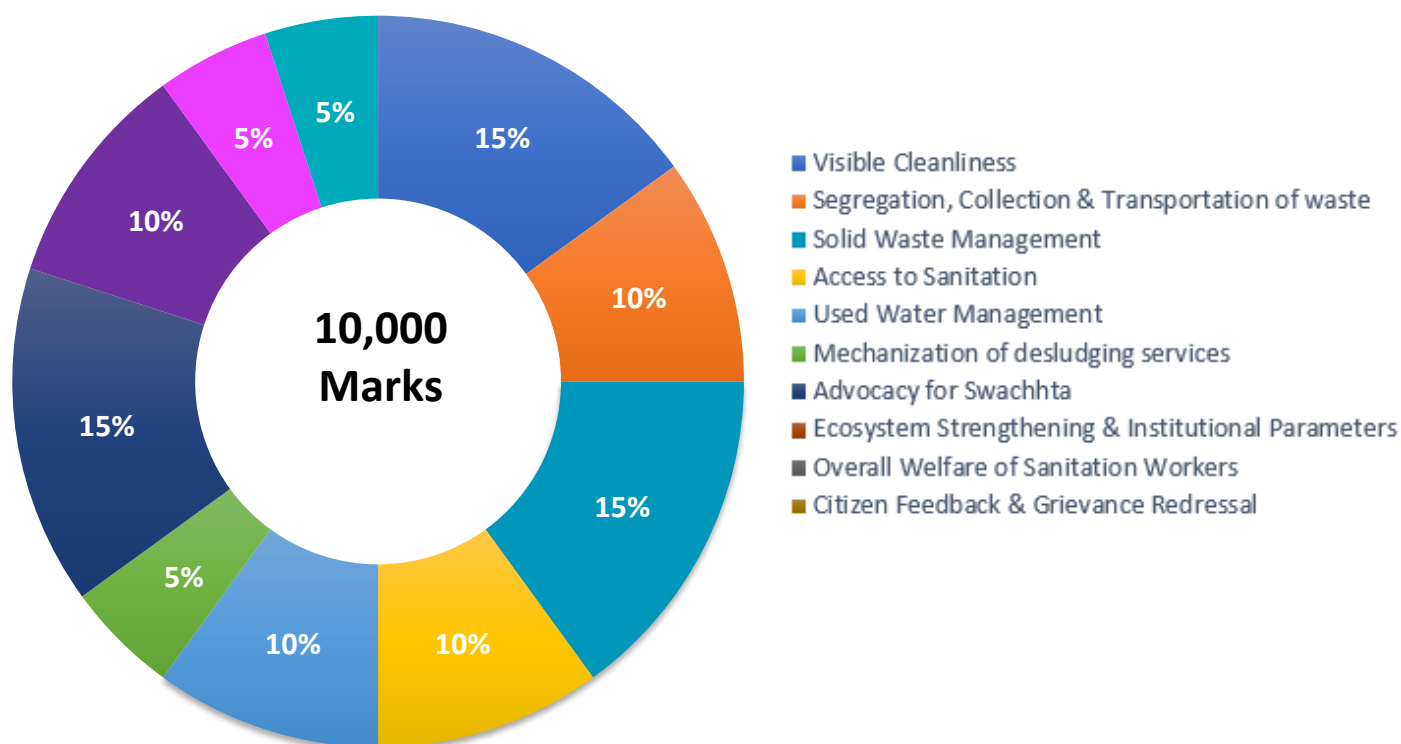

* Refer to Swachh Survekshan 2024-2025: Key Indicators

Detailed Bifurcation Swachh Survekshan Phase 4 (10,000 MARKS)

Sections	% Marks	Marks	Indicators	Sub- Indicators
1. Visible Cleanliness	15%	1500	13	31
2. Segregation, Collection & Transportation of waste	10%	1000	3	8
3. Solid Waste Management	15%	1500	11	25
4. Access to Sanitation	10%	1000	5	35
5. Used Water Management	10%	1000	5	8
6. Mechanization of desludging services	5%	500	3	19
7. Advocacy for Swachhta	15%	1500	5	17
8. Ecosystem Strengthening & Institutional Parameters	10%	1000	5	12
9. Overall Welfare of Sanitation Workers	5%	500	2	9
10. Citizen Feedback & Grievance Redressal	5%	500	2	2
Total		10,000	54	166

Note: Phase 4, originally carrying a weightage of 10,000 marks, has been reduced to 9,000 marks in the overall assessment framework. Phase 3 marks are excluded from the total score. Therefore, the combined marks from Phase 3 and Phase 4 contribute a total of 9,000 marks to the assessment.

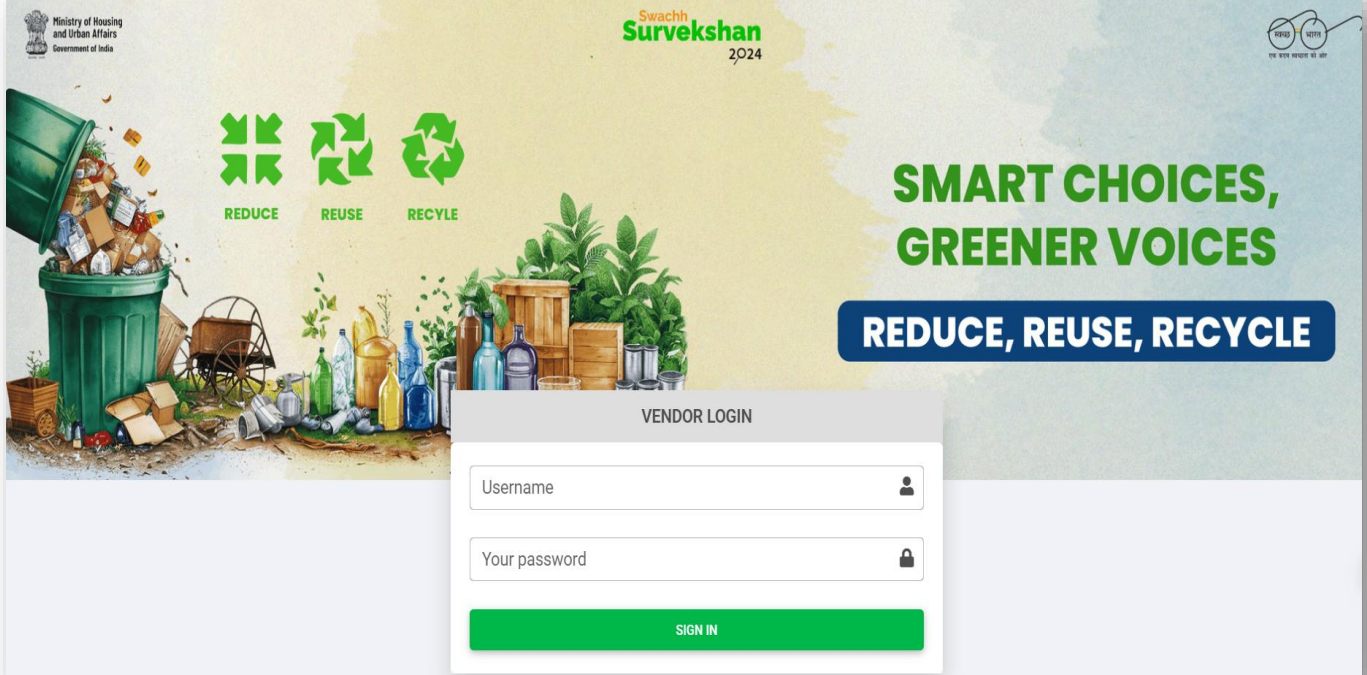

Weightage of Phase 4 Indicators (10,000 MARKS)

Swachh Survekshan 2024: Portal

The Swachh Survekshan Portal, developed by the Ministry of Housing and Urban Affairs (MoHUA), serves as a centralized digital platform for managing the Swachh Survekshan. It streamlines data collection, monitoring, and validation through a user-friendly interface connecting assessors with the monitoring team. All survey indicators are mapped on the portal, with assessors submitting responses that are reviewed in real time by the Assessor Monitoring Cell (AMC).

Swachh Survekshan 2024: Coverage

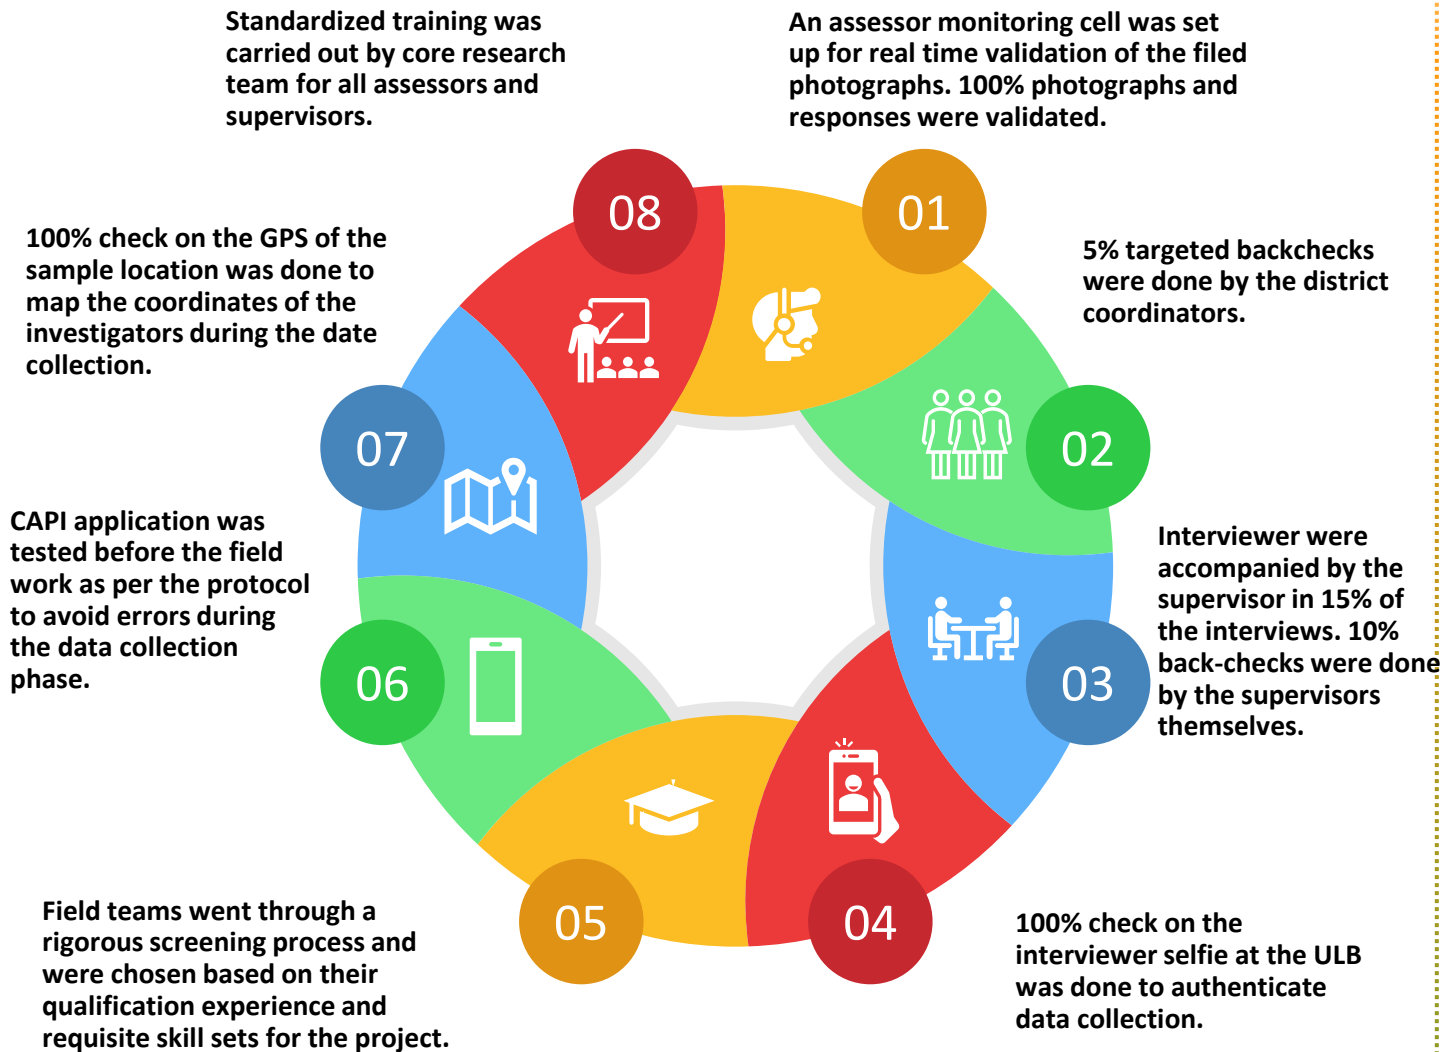

Citizen Feedback Coverage

Citizen feedback was gathered through five primary sources: the Vote for Your City application, website, the MyGov application, the Swachhta application, and face-to-face interviews. This process aimed to evaluate both the effectiveness of ULB initiatives in delivering real benefits to citizens and the overall level of public awareness.

Survekshan Quality Control: Key Highlights

3,000+ assessors were involved in data collection with close monitoring and control measures to followed at each stage of execution.

TOP LINE SURVEY FINDINGS

#1

1231

ULBs practice door-to-door garbage collection in more than 75% of wards

#2

2983

ULBs practice door-to-door garbage collection in more than 50% of wards

#3

4433

ULBs practice segregated door-to-door garbage collection in more than 25% of wards

#4

2429

ULBs have taken initiatives to encourage adoption of 3R principles (Reduce, Reuse, Recycle)

#5

2535

ULBs process at least 80% of their collected wet waste

#6

2520

ULBs process at least 80% of their collected dry waste

#7

2334

Cities have at least 80% of all constructed toilets (IHHL, CT and PT) attached to a sewerage

#8

881

ULBs have ensured that at least 80% of their Bulk Waste Generators (BWGs) are practicing on-site processing of wet waste

TOP LINE SURVEY FINDINGS

#9

2585

ULBs that are effectively encouraging youth participation in cleanliness activities through the Swachh Tulip program

#10

12

ULBs have received 7-star rating in GFC

#11

22

ULBs have received 5-star rating in GFC

#12

125

ULBs have received 3-star rating in GFC

#13

789

ULBs have received 1 star rating in GFC

#14

1624

ULBs are declared ODF+

#15

1627

ULBs are declared ODF++

#16

209

ULBs are declared WATER+

Super Swachh League Cities

Million Plus Cities (>10 Lakh)

Big Cities (3-10 Lakh)

Medium Cities (50,000 – 3 Lakh)

Small Cities (20,000 – 50,000)

Very Small Cites (<20,000)

Swachh Shehar Awards

Swachh Shehar with population >10 Lakh

Swachh Shehar With Population 3-10 Lakh

Swachh Shehar With Population 50,000 - 3 Lakh

Swachh Shehar With Population 20,000 – 50,000

Swachh Shehar With Population < 20,000

Introduction

Introduction

Background

Swachh Survekshan is the flagship annual cleanliness survey conducted under the ambit of Swachh Bharat Mission - Urban. It ranks cities across India based on a comprehensive set of sanitation and cleanliness parameters. More than a ranking exercise, it is a transformative tool that fosters healthy competition, encourages innovation, and measures the real impact of cleanliness efforts on the ground. The survey captures the extent to which cities have embraced and implemented sustainable sanitation practices, reflecting their commitment to building cleaner, healthier, and more citizen-friendly urban environment. Swachh Survekshan 2024-2025 is the 9th edition since its inception in 2016. Setting a bold new benchmark, it is simpler, sharper, more systematic, and all-inclusive.

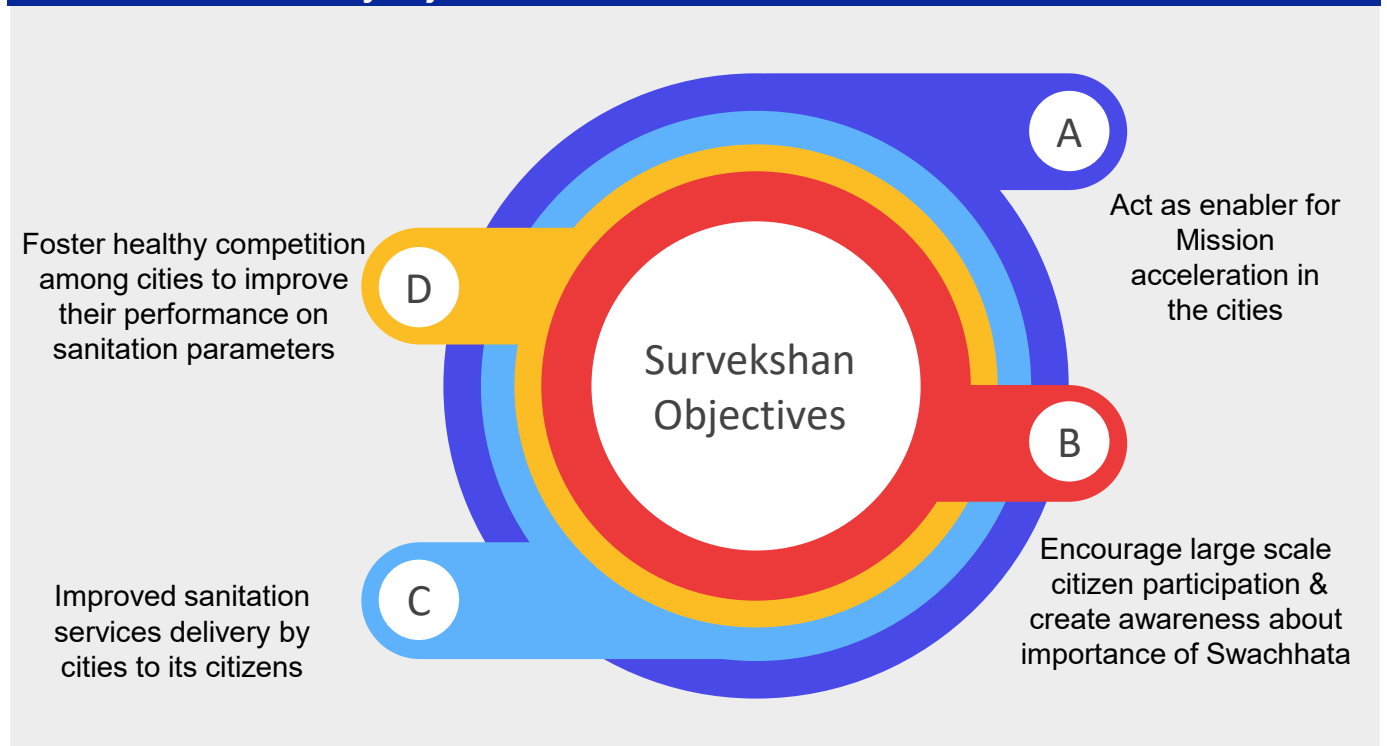

These features have been incorporated by significantly reducing complexity to streamline participation, while refining the evaluation criteria into clear and concise indicators. A structured framework now captures the full scope of urban sanitation through ten focused indicator sections – 1) Visible Cleanliness; 2) Segregation, Collection, and Transportation of Waste; 3) Solid Waste Management; 4) Access to Sanitation; 5) Used Water Management; 6) Mechanization of Desludging Services; 7) Advocacy for Swachhata; 8) Strengthening of Ecosystem and Institutional Parameters; 9) Overall Welfare of Sanitation Workers; and 10) Citizen Feedback and Grievance Redressal. For the first time, cities are categorized into five distinct population tiers—Very Small Cities (less than 20,000 Population), Small Cities (20,000 - 50,000 Population), Medium Cities (50,000 - 3,00,000 Population), Big Cities (3,00,000 - 10,00,000 Population), and Million-Plus Cities (more than 10,00,000 Population). — with assessment parameters calibrated to reflect the specific scale and needs of each group. Awards are given to winning cities in each category.

Objective

The primary objective of the survey was to drive improvements in urban sanitation by fostering extensive citizen engagement and raising awareness across all sections of society about the importance of cleanliness and the long-term vision for enhancing the sanitation of towns and cities.

Key objectives of Swachh Survekshan 2024-2025

Snapshots of Field Assessment

2

Methodology

Methodology

Participation by ULBs

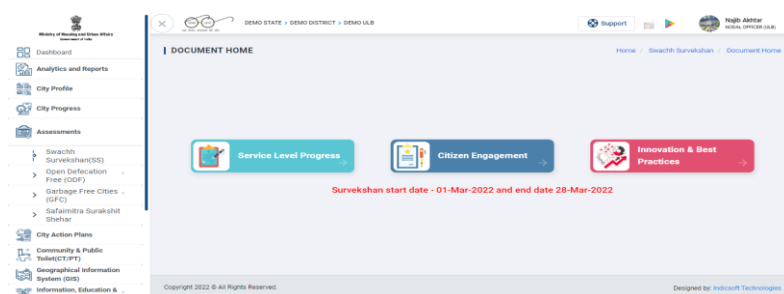

The 9th edition of Swachh Survekshan 2024-2025 was conducted to study the progress of the Swachh Bharat Mission – Urban 2.0 and rank the Urban Local Bodies (ULBs) in India based on various cleanliness and sanitation parameters. This year 4,589 ULBs have participated in the world's largest urban sanitation survey.

Year	No. of ULB	No. of Cantonment Boards	Ganga Town
2016	73		
2017	343		
2018	4203	61	
2019	4237	62	
2020	4248	62	97
2021	4320	62	91
2022	4354	62	91
2023	4,477	61	88
2024	4,589	58	88

Digitalized Survekshan

The year 2024-2025 edition of Swachh Survekshan was fully digitalized, with all documentation submitted online by ULBs via a dedicated digital portal. The ULBs also documented their service level progress on the Management Information System (MIS) through the Ministry's proprietary Swachhtam portal. An estimated 900 gigabytes of data were contributed by the ULBs. Field data collection was executed using mobile devices, thereby eliminating paper usage and augmenting the efficiency and precision of the assessment procedure.

Image of Swachhtam portal and ULB interface login

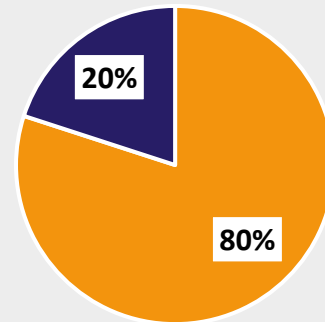

Assessment and Scoring Protocol

The cumulative score for the Swachh Survekshan assessment amounted to 12,500 marks. The Survekshan comprised two key components – 1.) Four Phase assessment accounting for 10,000 marks, 2.) Certification, which contributed 2,500 marks. The total score for the survey witnessed an increase from 9,500 in the year 2023 to 12,500 in the year 2024.

Quarterly Assessment

The Swachh Survekshan 2024 was conducted in four distinct phases. Phase 1 and 2 employed SLP indicators specifically formulated for Swachh Survekshan 2023. The requisite documents were submitted through the specialized Swachh Survekshan 2024 portal, accessible via <https://ss-vendor.sbmurban.org>. The validation of documents for both Phase 1 and Phase 2 was accomplished through a telephonic validation process. While Phase 1 and 2 were allocated 500 marks each, Phase 3 and 4 comprised higher weighted scores, amounting to 9,000

Percentage Distribution of Marks

■ Swachh Survekshan (4-Phase Assessment)
■ Certification

marks collectively. Verification in Phase 3 involved on-site visits to the Bulk Waste Generators facilities, and in Phase 4, all indicators were substantiated through an extensive on-field validation process. Each indicator was cross validated with the data retrieved from a combination of all or few of the following: Direct observation/on-field assessment, citizen validation in field, on-call citizen validation and using data from Swachhatam Portal.

Certification: (Star Rating of Garbage Free Cities and Open Defecation Free)

In 2019, MoHUA introduced an important component to the Survekshan i.e., Certification. This assessment covered two different aspects- Star Rating of Garbage Free Cities (GFC) and Open Defecation Free (ODF) Cities. The score for star rating and ODF rating was 2,500 which was added to the Swachh Survekshan score for final ranking.

Star Rating of Garbage Free Cities

This is a time bound certification process (with validity of one year) which involves assessment of various types of locations and facilities across every ward of the city. It is based on **SMART** Framework- **S**ingle metric, **M**easurable, **A**chievable, **R**igorous verification mechanisms and **T**argeted towards outcomes. It has been devised in a holistic manner including components at the ward level as well as at the city level. The ward level locations include residential area, commercial and institutional areas, parks and gardens and Bulk Waste Generators (BWGs). The city level infrastructure covered railway stations, airports, transport hubs, industrial areas, water bodies and storm drains, all dumpsites, processing plants and scientific landfills, and tourist areas including places of religious worship.

Citizen validation is also an integral part of this protocol and at every site/facility visited for assessment, a minimum number of citizens (and RWA members for residential areas) needed to be contacted and interviewed to seek their feedback on the level of cleanliness in that locality. Based on current progress level indicators such as cleanliness of drains and water bodies, plastic waste management, managing construction and demolition waste, etc. which are critical drivers for cities achieving garbage free status, the ULBs registering themselves for certification were assessed on the basis of third party certification for achieving 1-, 3-, 5-, and 7-Star rating. All star ratings were handled by the respective states and are given by the MoHUA post third party assessment.

The following tables provides a snapshot of the GFC Star Rating:

Component/Condition		1 Star	3 Star	5 Star	7 Star
1	Door to Door Collection	> =80 %	> =90 %	> =90 %	> =90 %
2	Source Segregation	> =40 %	> =60 %	> =80 %	> =90 %
3	Wet Waste Processing	> =50%	> =70%	> =80%	> =90%
4	Dry Waste Processing	>= 50%	>= 70%	>= 80%	>= 90%
5	Dumpsite Remediation	Work commence	25-40% work completed	40-70% work completed	90% work completed

Certified GFC Star Rating Status		Marks	Number of ULBs
	1 Star	500	789
	3 Star	800	125
	5 Star	1,100	22
	7 Star	1,300	12

ODF Status Criteria

Cities and towns that have already achieved Open Defecation Free (ODF) status, as per the protocol prescribed by MoHUA, can work towards ensuring sustainability of ODF status by properly maintaining toilet facilities, hereby referred to as SBM ODF+; and safe collection, conveyance, treatment & disposal of all fecal sludge & sewage, hereby referred to as SBM ODF++, in order to achieve safe sustainable sanitation for all. An ODF city/ward/work circle can be notified/declared as SBM ODF+ if, at any point of day not a single person is found defecating and/or urinating in open, all community & public toilets are functional and well maintained. Once a city has collected all declarations from each ward (including schools) as per protocol, it communicates final resolution declaring the city to be SBM ODF+ to respective state government. Thereafter, state government communicates the same to MoHUA (or in case of development authority or cantonment board, city has directly communicated to MoHUA). A third party verification process (Swachh Certification for SBM ODF+) is to be adopted, for the final SBM ODF+ certification. City/ward/work circle which is already ODF+ can be notified/declared as SBM ODF++ if, at any point of day, not a single person is found defecating and/or urinating in open, all community & public toilets are functional and well maintained, fecal sludge/septage & sewage is safely managed and treated, with no discharging and/or dumping of untreated fecal sludge/septage & sewage in drains, water bodies or open areas. In the case of Water+ certification, a city must demonstrate its commitment to maintaining cleanliness in the rivers and drains under its administration. To be declared a Water Plus City, certain conditions must be met, including the treatment of wastewater released from households and commercial establishments, ensuring that all public toilets in the city are connected to sewer lines and are clean. Lastly, it is required that 30% of the city's sewer water is recycled and reused.

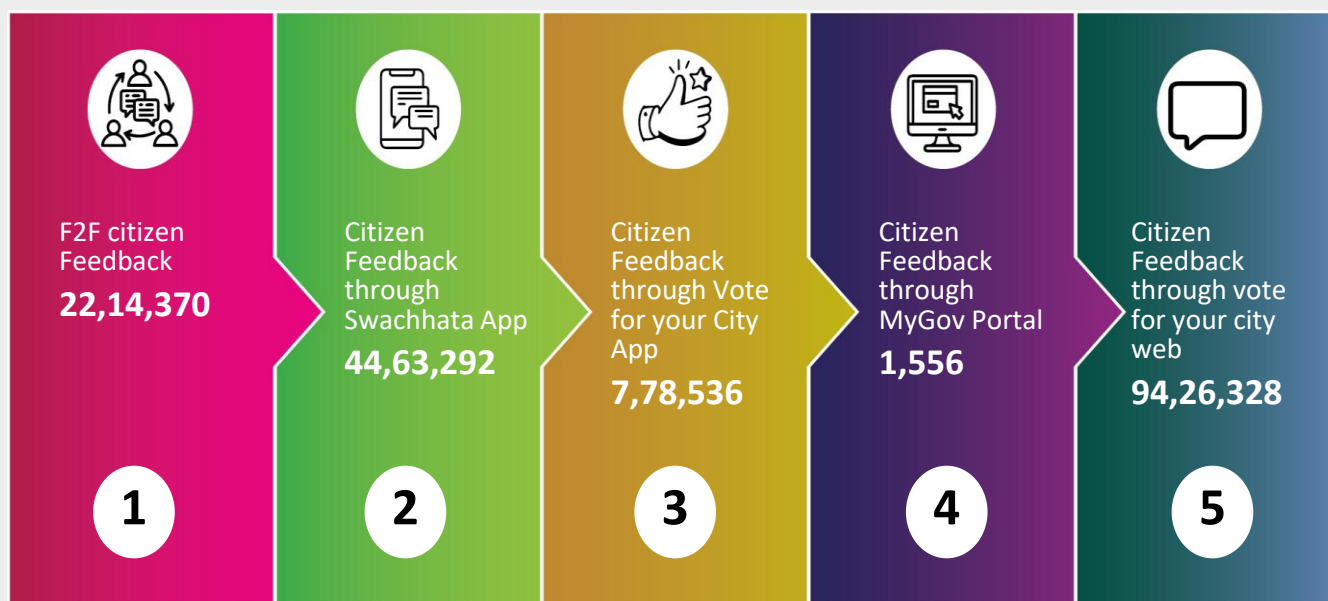

The following table provides a snapshot of the ODF Status-

Certified ODF Status		Marks	Number of ULBs
ODF City Certified	1 Star	500	946
ODF+ City Certified	3 Star	750	1624
ODF++ City Certified	5 Star	1,000	1627
Water + City Certified	7 Star	1,200	209

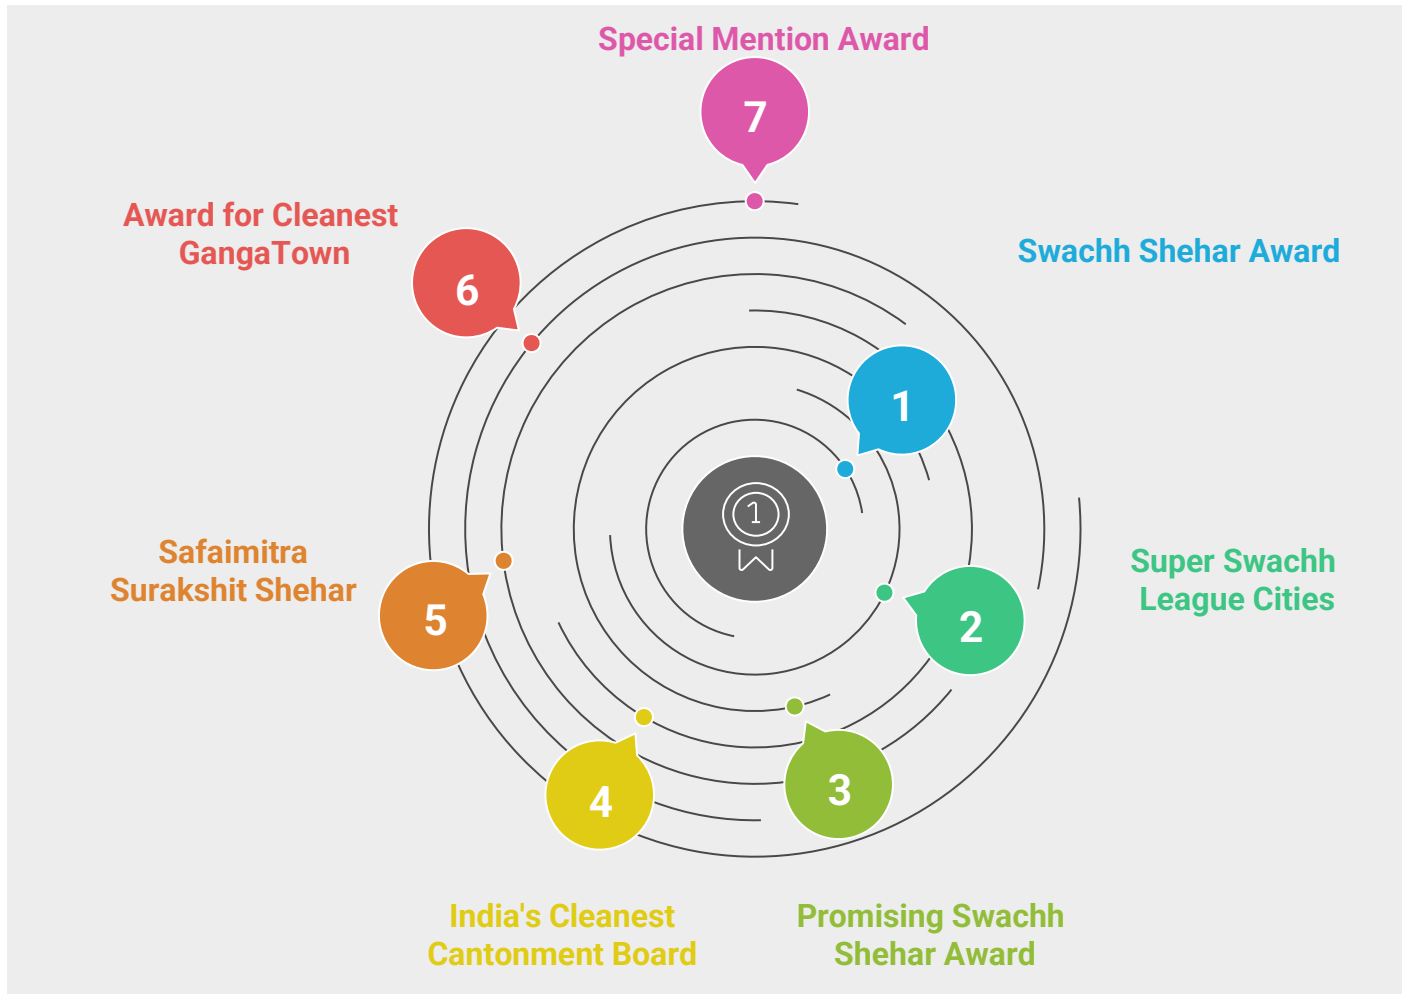

Citizen voice

The citizen feedback component of Swachh Survekshan 2024–2025 encompassed a comprehensive range of questions aimed at assessing both service delivery and citizen engagement in urban sanitation. Residents were asked about the regularity of waste collection from households and commercial establishments, the visible cleanliness of their residential areas, and the frequency of unattended garbage piles. The survey also evaluated citizens' practices and awareness related to waste segregation at source, the manner in which waste is loaded by collection staff, and the effectiveness of local authorities in maintaining cleanliness in public spaces such as markets, parks, and bazaars. In addition, the feedback sought to gauge awareness about Reduce, Reuse, Recycle (RRR) centres and the mandate for licensed operators in the cleaning of sewers and septic tanks. Questions on user satisfaction with the cleanliness and upkeep of public toilets, as well as the responsiveness of local authorities to cleanliness-related grievances, offered insights into citizens' lived experiences and the responsiveness of urban local bodies (ULBs). This holistic feedback mechanism played a vital role in capturing ground realities and strengthening accountability in urban sanitation governance.

Number of Citizens' Feedback received via 5 channels

Categories of Awards for Swachh Survekshan 2024-2025

Swachh Shehar Award

The primary objective of Swachh Survekshan was to award the cleanest city in each population category. The computation for this award comprised of scores from the two evaluation areas of Swachh Survekshan mentioned below:

1. Swachh Survekshan (4-Phase Assessment)
2. Certifications.

The total marks for these three components were 12,500. The cities having the highest overall marks under each population category were nominated for the award.

Super Swachh League Cities

The qualifying criteria for cities is that they must have ranked in the top three at least once in the last three years and must remain in the top 20% of their respective population category in the current year's Swachh Survekshan assessment.

Promising Swachh Shehar Award

The top-ranking cities that secured the highest overall scores in Swachh Survekshan, based on the four-phase assessment and certification out of a total of 12,500 marks, within their respective states and Union Territories have been conferred this award. As per the 'one city, one award' principle, if a city has already received another award, the next highest-scoring eligible city is selected. A total of 33 such awards have been conferred under this category.

India's Cleanest Cantonment Board

About 58 Cantonment Boards participated in Swachh Survekshan 2024–2025. The award for the Cleanest Cantonment Board was based on the total marks obtained out of 12,500, which included the four-phase assessment and certification scores.

Safaimitra Surakshit Shehar

Safaimitra Suraksha Challenge (SSC) was launched on the occasion of World Toilet Day on November 19, 2020, by the Ministry of Housing and Urban Affairs (MoHUA). This was a first-of-its-kind Challenge which was later integrated into the larger purview of Swachh Survekshan 2022 and now also in Swachh Survekshan 2024-2025 within the “Ecosystem Strengthening & Institutional Parameters”. The Safaimitra Suraksha Indicators are aimed at preventing hazardous cleaning of sewers and septic tanks and promoting mechanized cleaning.

It also intends to thrust upon the following aspects: mechanized cleaning of sewers and septic tanks in order to minimize the necessity of human entry, providing proper protective gears and equipment and identification of informal workers and thereby integrating them into the formal mechanism and their empowerment. The performance parameters were divided into four parts: Core Equipment, Ecosystem parameters, IEC, Capacity Building and Empowerment. The data collection process had the following main components– Documentation, Direct Observation, Citizen Validation and Safaimitra On-Call Validation. Validation of Safaimitra Suraksha Indicators for all 4,589 cities was based on the Documents provided by the ULBs. There were 3 prerequisites that the cities had to surpass to be eligible for Safaimitra Suraksha indicators:

1. Setting up of Responsible Sanitation Authority (RSA) or Sanitation Response Unit (SRU):

States must have notified RSAs or established SRUs in the participating cities to take care of emergency situations of blockages of sewers & septic tanks and thereby preventing manual hazardous cleaning.

2. Valid ODF+ (or above) Certification:

This certification ensures that the mechanized cleaning takes place seamlessly, with the obstacle of open defecation out of the way.

3. Notification of ban on single use plastic Ban:

Ban on single use plastic including <75-micron plastic was to be notified so as to minimize the choking of sewers and septic tanks.

The validation and scoring of Safaimitra Suraksha Indicators were a result of careful coordination and a combination of Documental evidence, Direct Observation, Citizen Validation and On-Call Validation of Safaimitras. Documentation was a vital part of the assessment as it ensured the quality standards were routinely met. It minimized the potential for errors and reduced downtime when deviations occurred as access to relevant data was readily available. The On-field assessment was conducted through visits to the Equipment sheds of each of the nominated ULBs, where the ‘availability Vs requirement’ of Core equipment, Special equipment and safety gears were assessed. Citizen Validation was a crucial tool to validate the claims made by the ULB, citizens were asked questions regarding awareness of PEMSRA 2013, Helpline Number 14420 etc. On Call Validation from Safaimitras was also conducted to verify the claims made by the ULB such as availability of PPE kits and Safety Gears, Provision of Hardship allowance etc.

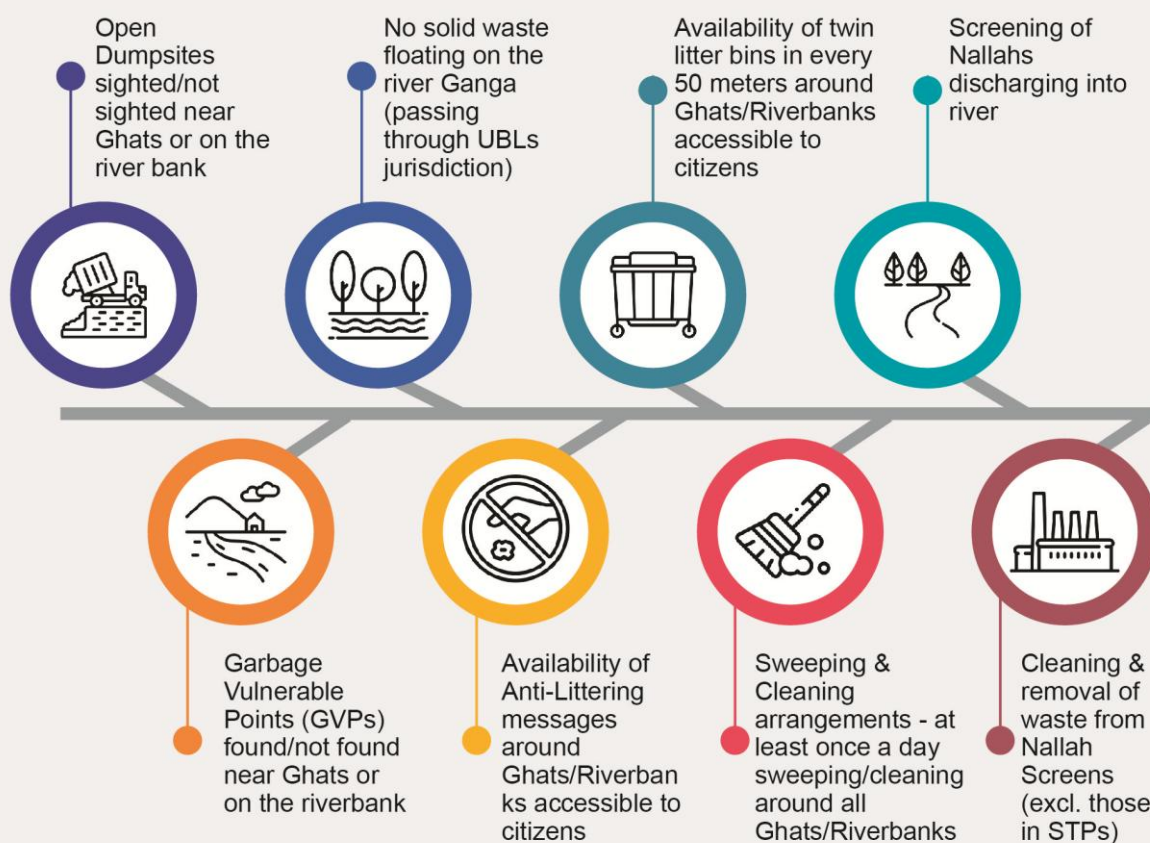

Award for Cleanest Ganga Town

Evaluation for Cleanest Ganga Town City Award has been done while considering marks received for direct observation for the following indicators:-

- Open Dumpsites sighted/not sighted near Ghats or on the riverbank
- Garbage Vulnerable Points (GVPs) found/not found near Ghats or on the riverbank
- No solid waste floating on the river Ganga (passing through ULBs jurisdiction)
- Availability of Anti- Littering messages around Ghats/Riverbanks accessible to citizens
- Availability of twin litter bins in every 50 meters around Ghats/Riverbanks accessible to citizens
- Sweeping & Cleaning arrangements - at least once a day sweeping/cleaning around all Ghats/Riverbanks
- Screening of Nallahs discharging into river
- Cleaning & removal of waste from Nallah Screens (excl. those in STPs)

The Ganga town assessment was conducted in 88 towns. The final scores and ranking was calculated based on the scoring of Ganga Towns (100 Marks) & ULB's score in Swachh Survekshan 2024-2025 (10,000)

Indicators for Ganga Town Evaluation

Recognition of Special Initiative of Swachh Mahakumbh 2025

A special award was conferred upon the city of Prayagraj for its exemplary efforts in maintaining cleanliness during the Swachh Mahakumbh 2025. The city demonstrated outstanding planning, execution, and sanitation management during the large-scale congregation, ensuring a clean and hygienic environment for millions of pilgrims. This recognition highlights Prayagraj's commitment to upholding the principles of Swachh Bharat Mission-Urban 2.0, even during high-footfall events of national significance.

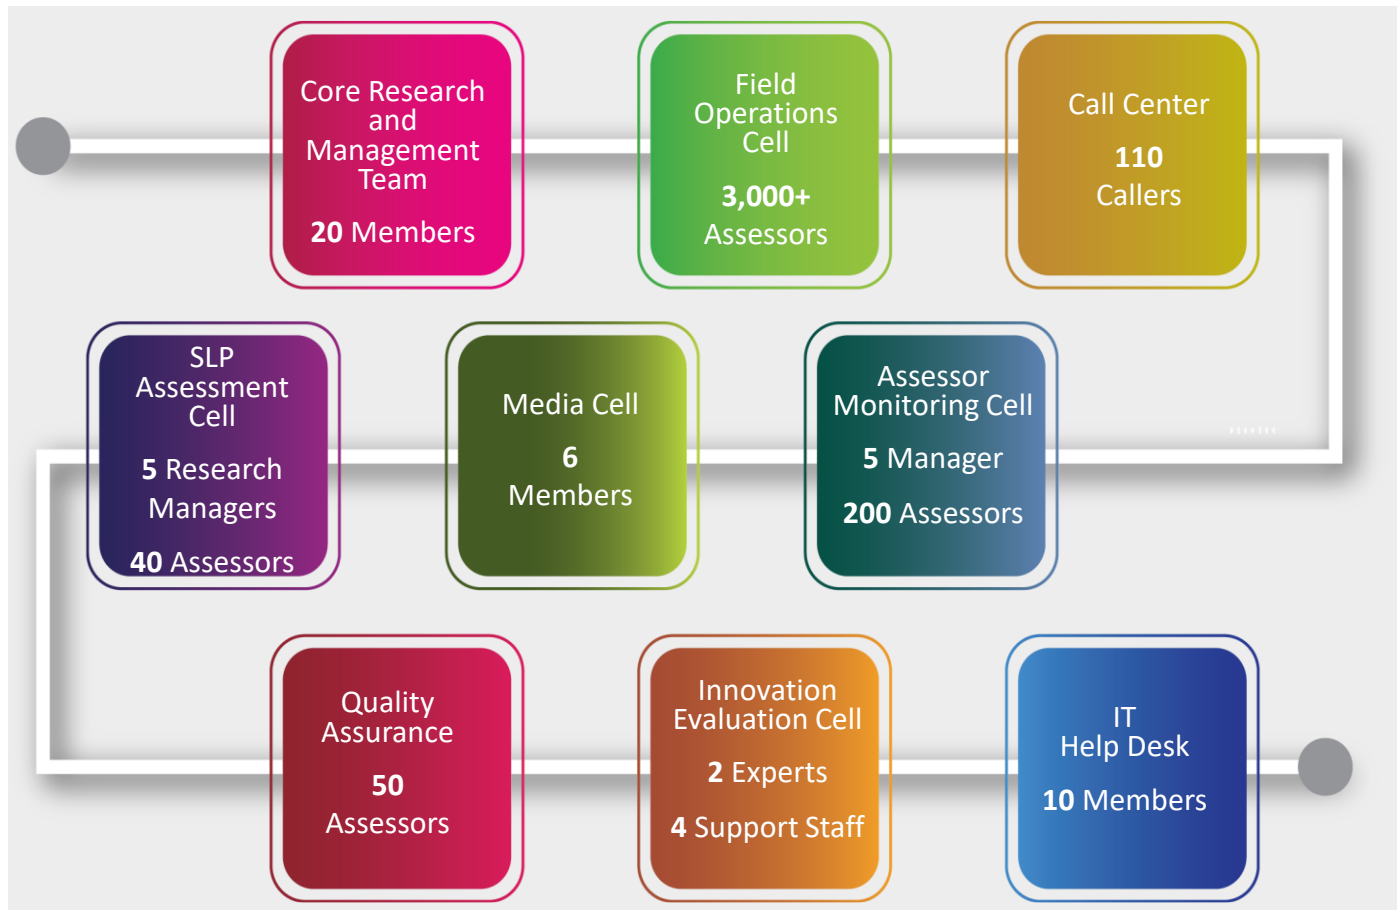

3

The Survey Delivery Process

The Survey Delivery Process

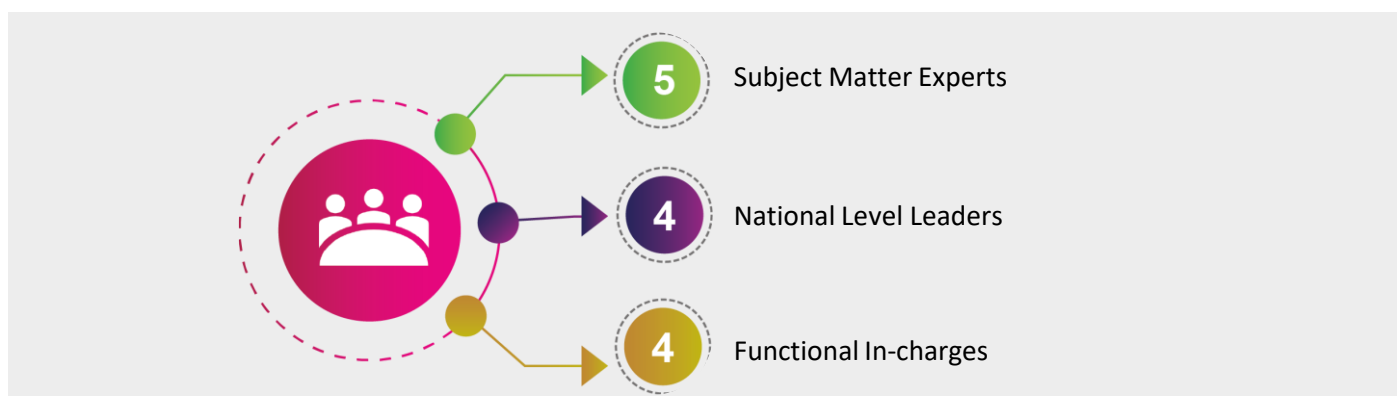

Cells/Units for delivery of the Survey

The survey delivery was done by breaking down the task and responsibilities across various cells/units. There were 9 cells/units and large number of manpower was deployed to complete this mass exercise.

Core Research and Management Team

At the apex, there were 20 core team members - comprising of core researchers, subject matter experts, and functional in charges. This team guided the entire project and was responsible for the end-to-end management of Swachh Survekshan 2024.

Field Operations Cell

The field operations cell was involved in conducting the direct observations and collecting citizen feedback in 4,589 ULBs. Close to 3,000 assessors moved into the field to complete assessments. The field assessors assessed the sampled facilities/locations across ULB and also captured photographic evidence for their observations, on a CAPI device. The photographic evidences uploaded through the CAPI were checked in real-time and validated by the Assessor Monitoring Cell. Upon completion of the direct observation, field executives collected citizen feedback at various locations in ULB.

Assessor Monitoring Cell

The assessor monitoring cell was set up in the NOIDA project office of Ipsos, which was manned by more than 200 assessors who did 100% real time monitoring of movement of field assessors and checked the photographic evidence - synced through the assessors' application. The assessor was guided to re-do the assessment, in case, the quality parameters of data collected were not met. The assessor monitoring cell checked the authenticity of Citizen Validation (CV) and DO (Direct Observation) evidence as per sample quota before closing the ULBs assessment.

Desktop Assessment Cell

The Desktop Assessment Cell was manned by 40 members, who were stationed at the NOIDA project office of Ipsos, and desktop assessor reported directly to the research and project management team. These 40 desktop assessors were divided into 5 teams and were headed by 5 state coordinators. Depending on the number of ULBs in a state, teams were equally divided and given the responsibility to conduct an assessment of the ULBs in the state. The desktop assessors were selected keeping language proficiency in mind. State-specific assessment teams had desktop assessors who could read, write and understand the language of their respective states. Desktop Assessment Cell was responsible for reviewing all the uploaded documents (soft copy) submitted by ULBs under the 'Service Level Progress' component as well as MIS data received from the Ministry. The desktop assessors thoroughly checked the authenticity of the provided documents based on protocols given under the SS2024 toolkit and information provided in the document. A few highlights of the cell are mentioned below:

- Language capability (reading and writing) was a critical recruitment criterion for ensuring state-specific reorganization of responsibilities.
- Desktop assessors were also responsible for guiding ULBs to correctly fill out city profiles.
- Flagging the concerned indicator in case of any discrepancy was found by the team and giving 48-hour windows to the ULB where they can upload flagged documents afresh was also a part of their responsibilities.
- The First level of scoring was based on documents uploaded after 48 hours window timeframe post flagging.
- Second level of quality check performed by an independent QC team consisting of desktop assessors and research managers.
- Team was responsible for carrying out a re-check of uploaded documents before the actual scoring could begin.

IT Help Desk

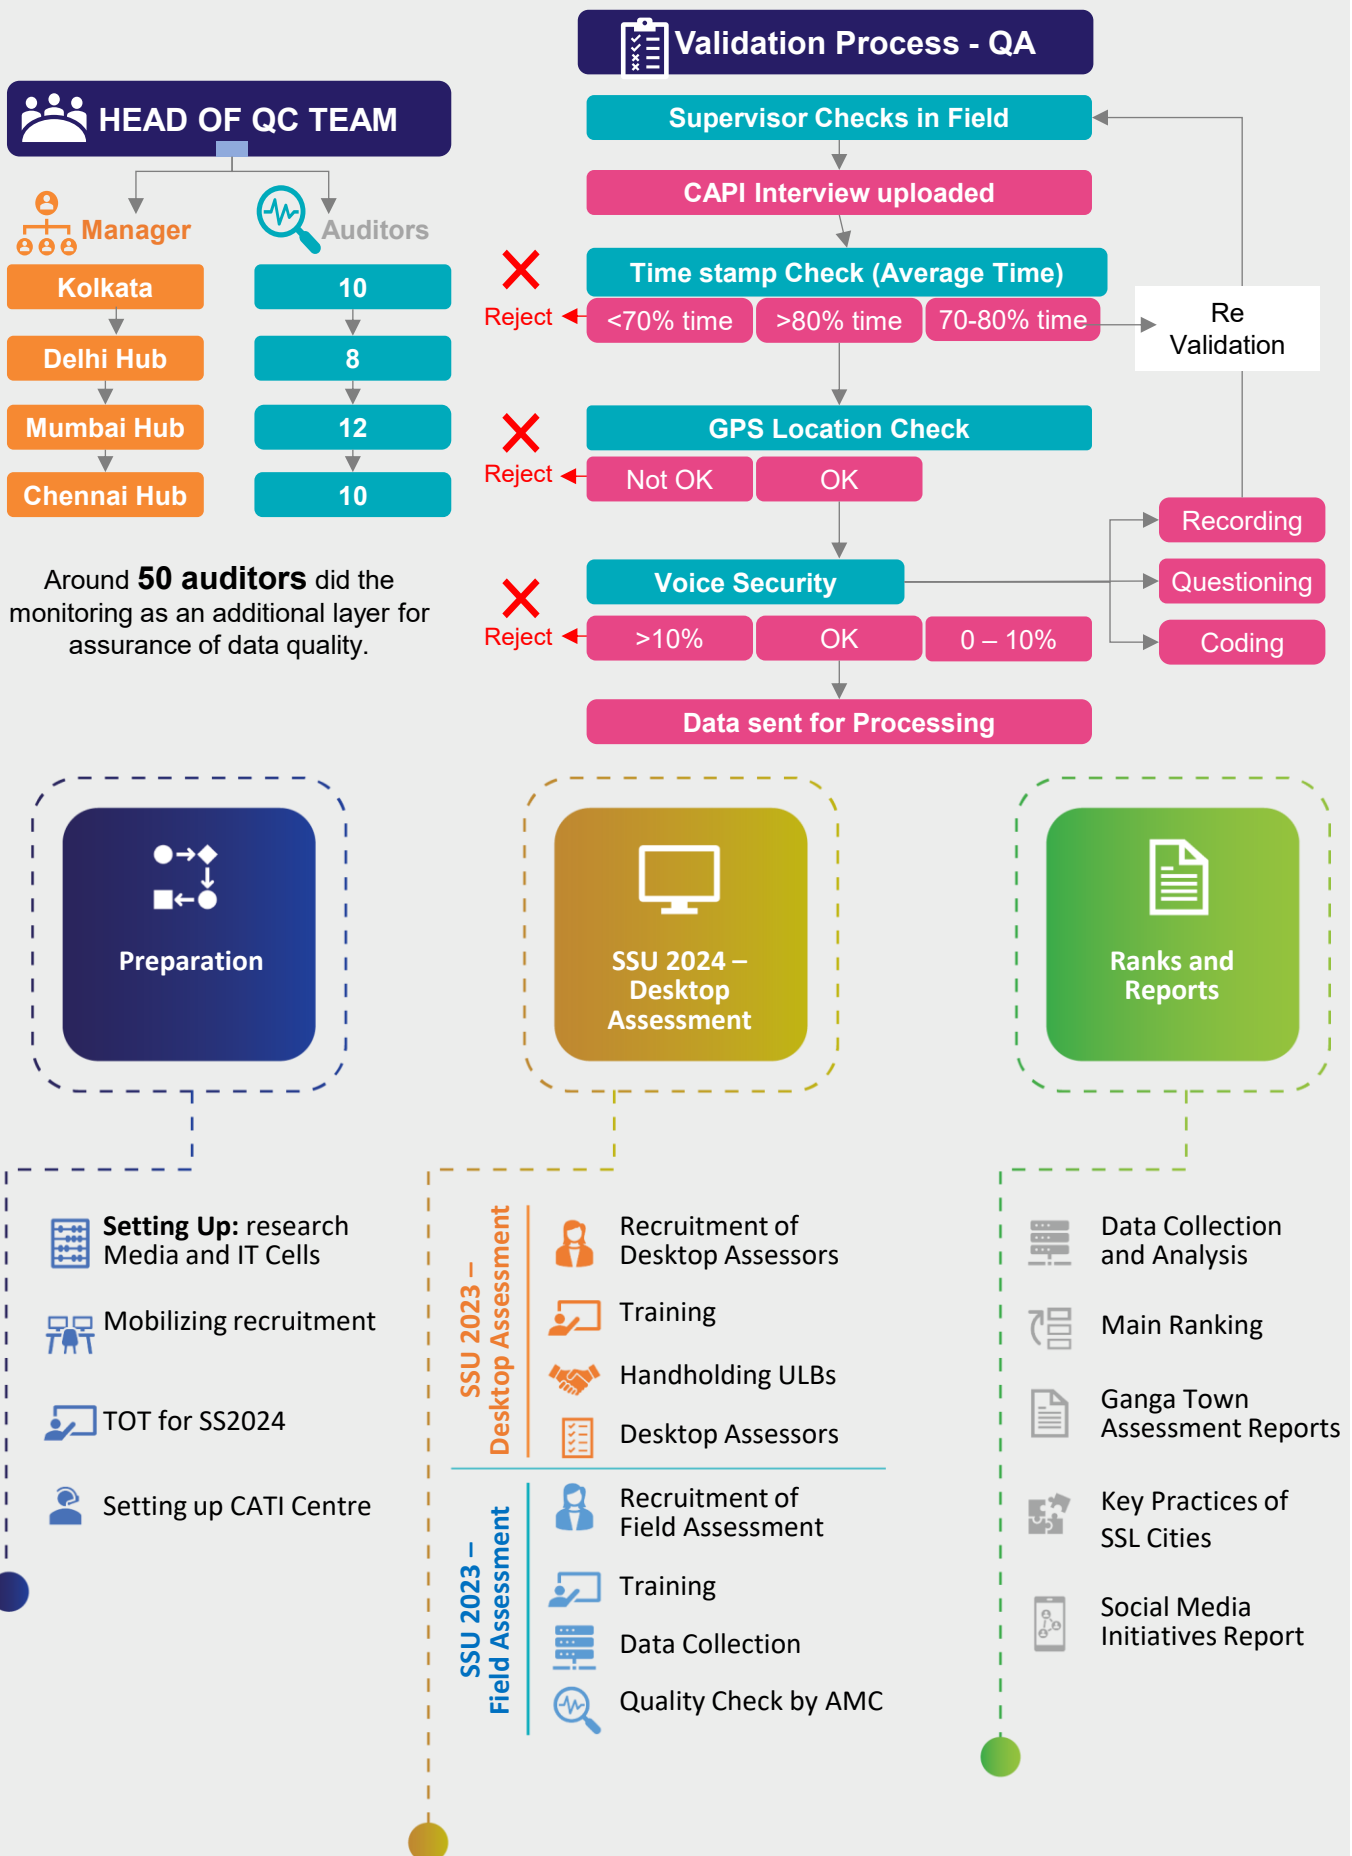

The IT helpdesk was overseen by a team of 10 highly skilled software engineers. This helpdesk played a pivotal role in offering support to ULBs during registration processes and the uploading/updating of city profiles. Additionally, a senior team was actively engaged in the continuous development and maintenance of the official website, <https://ss-vendor.sbmurban.org>. Furthermore, the IT team demonstrated its proficiency by creating various applications utilized during the Survekshan on both Android and iOS platforms. They were also instrumental in implementing automated sampling for DO/ICV. Taking charge of server maintenance, the team ensured real-time synchronization of evidence collected from the field for effective monitoring purposes.

Innovation Cell

The Innovation Cell was led by subject matter experts who established criteria for the evaluation of innovations of the 23 Super Swachh League Cities. Key practices submitted by ULBs underwent scrutiny based on pre-defined criteria, and experts studied them to understand the gaps in other non-performing cities. Each expert had the support of a team consisting of four members.

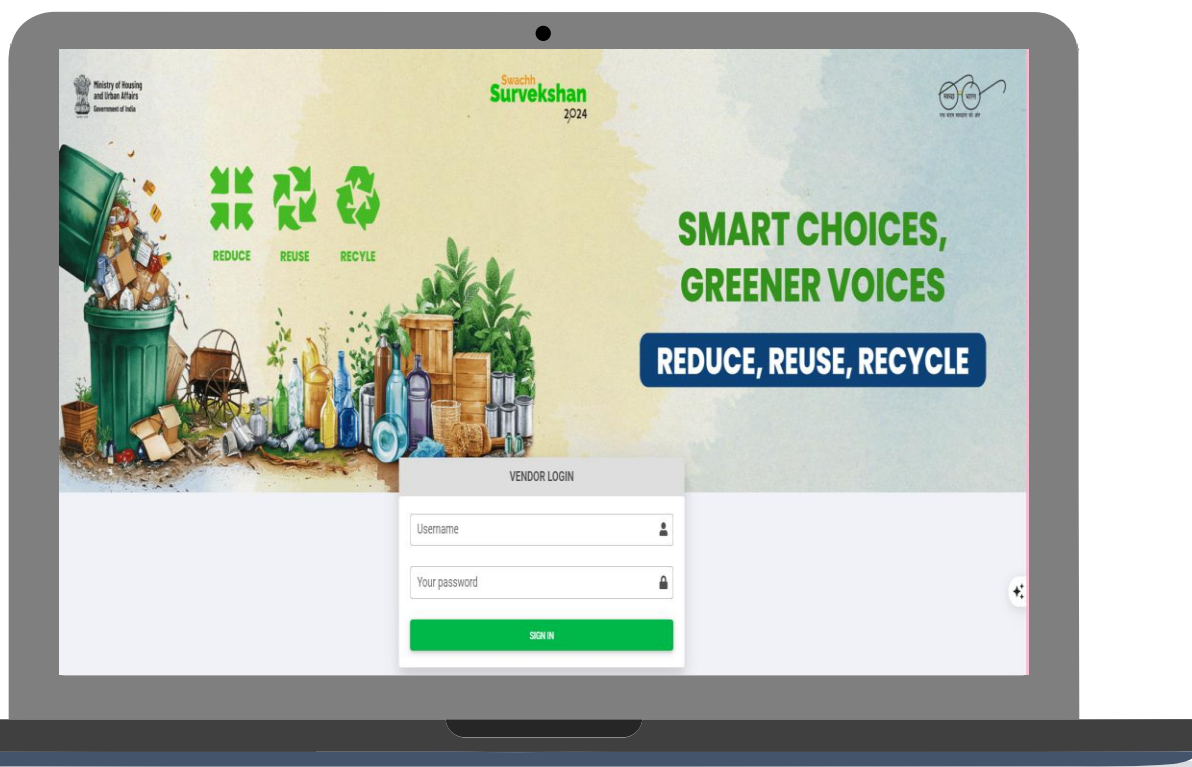

Quality Assurance

SS2024 Portal and Services

The preexisting portal and mobile applications for Swachh Survekshan was enhanced for SS2024. Necessary updates and changes were made as per the requirement.

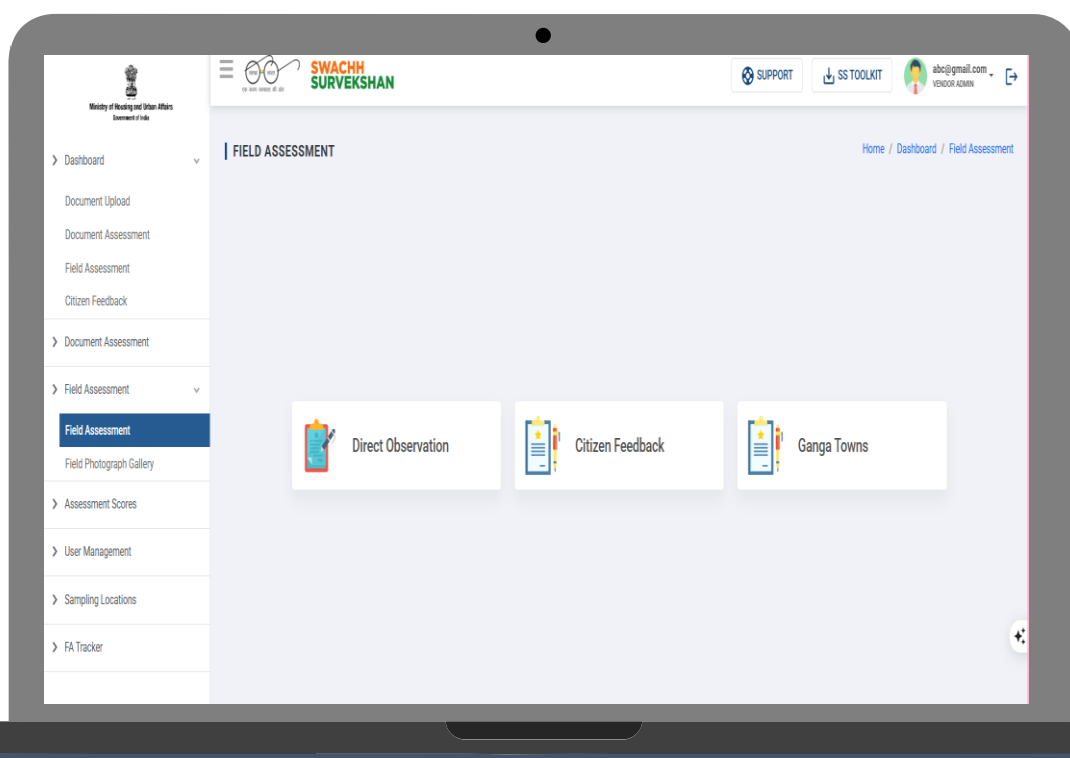

Web Portal and Dashboard

Login Screens of SS2024 Portal

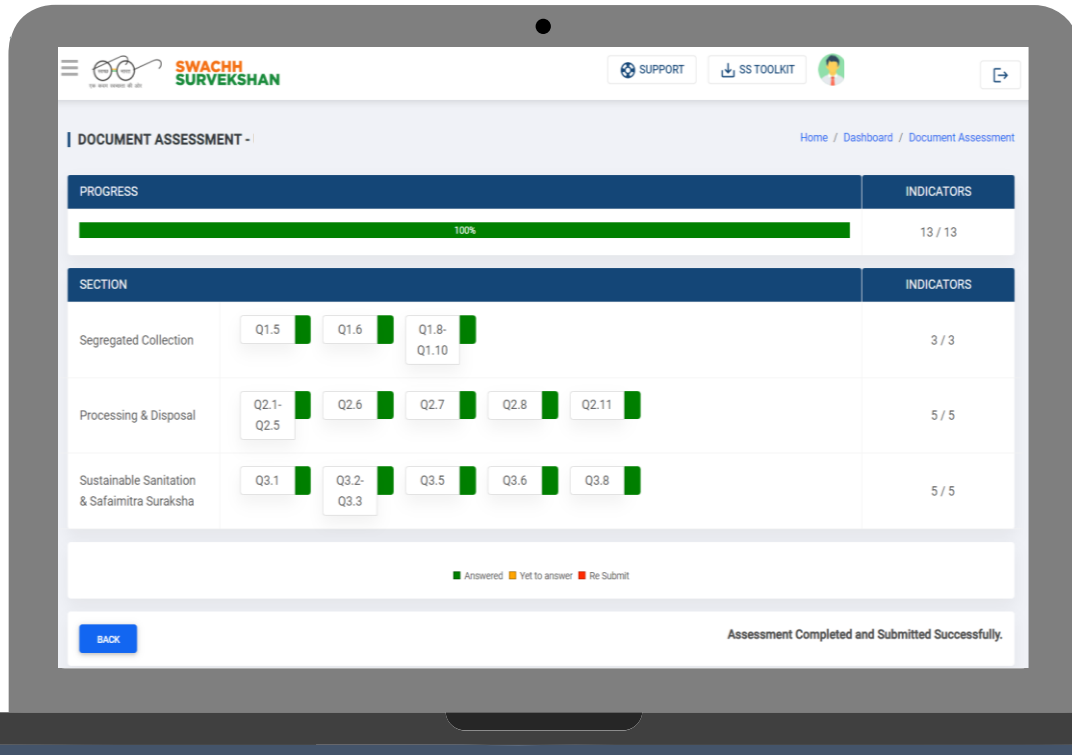

A login was provided to each ULB, allowing them to input the necessary details for SS2024. Once logged in, the dashboard displayed various sections, including a Self-Assessment Tool, Documents Uploading Portal, Social Media, and other events. Additionally, it included access to important reference documents, a live chat feature, and a "Contact Us" section.

Self Assessment Tool

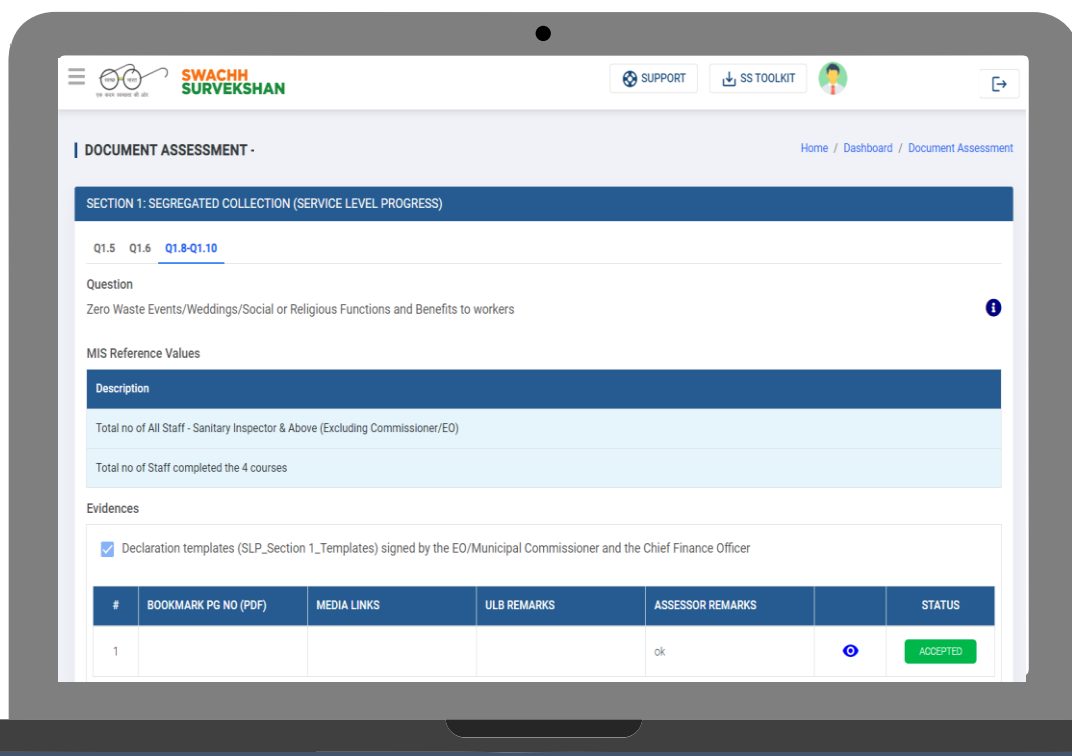

ULBs were able to keep a record of all the documents they had uploaded and a record of documents yet to be uploaded by them in the respective indicators. The progress bar was indicative of the same.

Document Uploading Portal

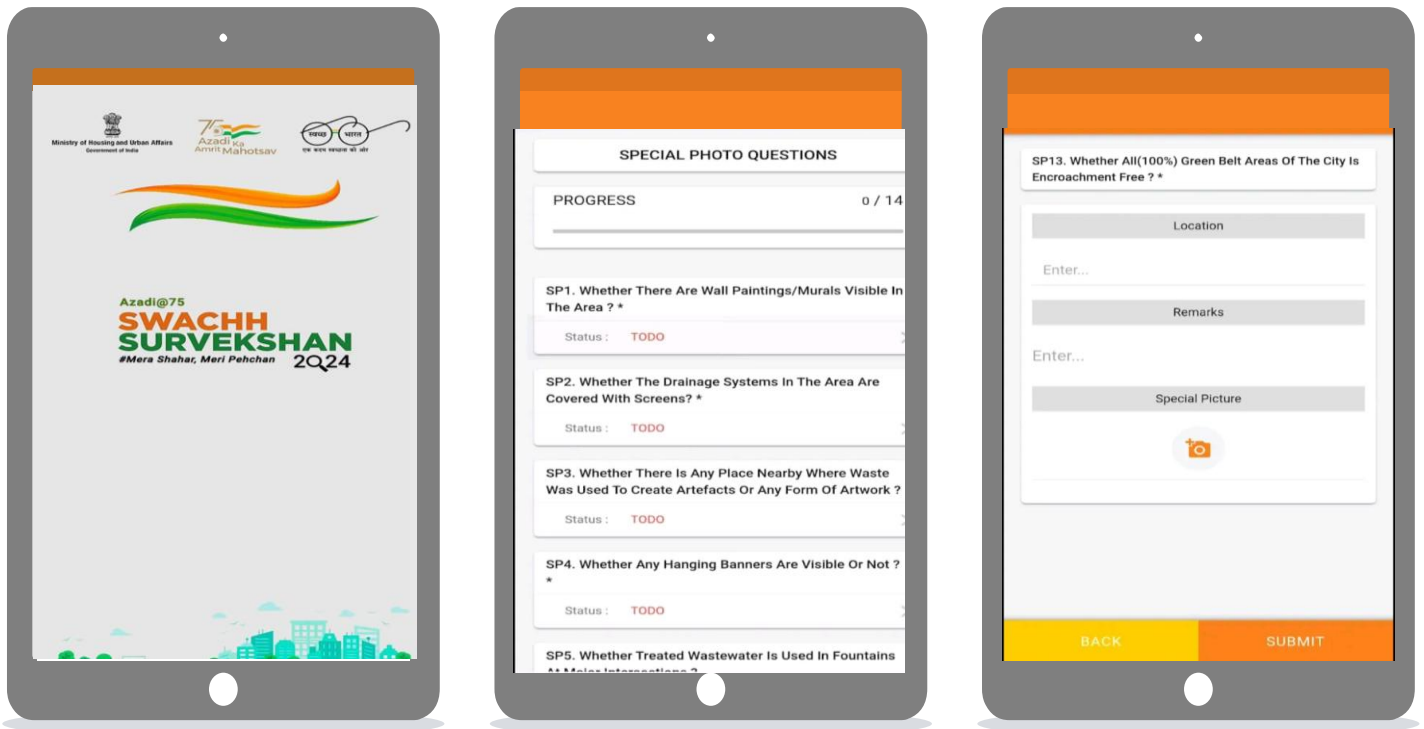

In this screen ULBs were required to upload all the mandatory documents as proof of details for assessment and they could also continuously monitor their progress through overall progress displayed.

SS2024 Direct Observation Application

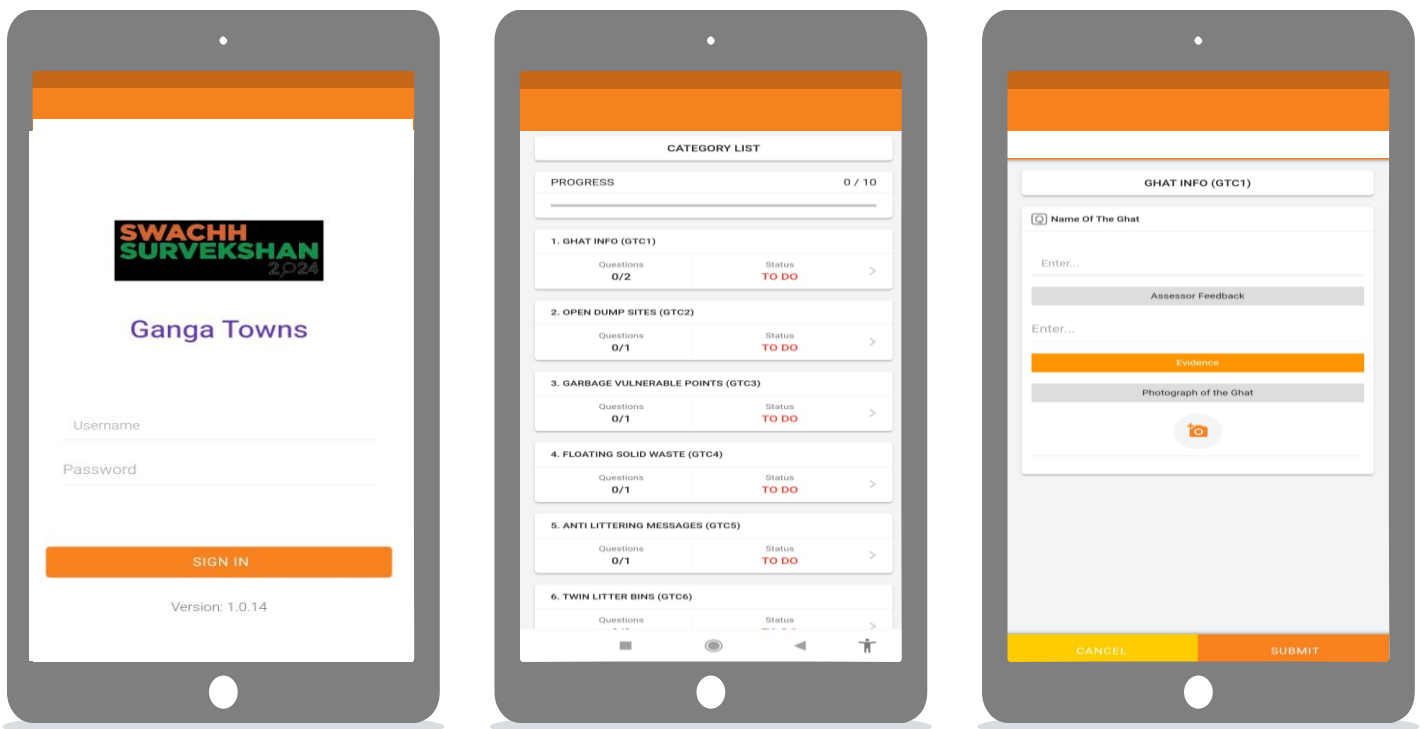

Direct Observation (DO) App enabled the assessors to capture their own observations along with videos and photographic evidence as a part of verifications on the claims made by the ULBs in MIS and SLP.

SS2024 Ganga Town Application

Ganga Town application login was provided to conduct the on-field assessment of the ghats for allocated ganga towns.

Survey Results

Super Swachh League Cities

A special category of the Super Swachh League has been introduced this year. This has been initiated to recognize cities that demonstrate extraordinary performance in the field of Swachhata. The League will feature the cities that have ranked in the top three at least once in the last three years and must remain in the top 20% of their respective population category in the current year's Swachh Survekshan Assessment. List of the Cities in their respective Population category is mentioned below:

Rank	State/ UT Name	ULB Name
1.	Million Plus Cities (>10 Lakh)	Maharashtra: Navi Mumbai Madhya Pradesh: Indore Gujarat: Surat Andhra Pradesh: Vijayawada
2.	Big Cities (3-10 Lakh)	Andhra Pradesh: Guntur Karnataka: Mysore Gujarat: Gandhinagar Madhya Pradesh: Ujjain Uttar Pradesh: Noida Union Territory: Chandigarh
3.	Medium Cities (50,000 – 3 Lakh)	Andhra Pradesh: Tirupati Chhattisgarh: Ambikapur Delhi: New Delhi Municipal Council Maharashtra: Lonavala
4.	Small Cities (20,000 – 50,000)	Maharashtra: Vita, Sasvad, Deolali Pravara Rajasthan: Dungarpur
5.	Very Small Cities (<20,000)	Chhattisgarh: Patan, Bishrampur Maharashtra: Panchgani, Panhala Madhya Pradesh: Bundi

Ranking of Million Plus Cities based on total score (More than 10 Lakh Population)

Rank	State/ UT Name	ULB Name	Total Score (12,500)	SS2024 (10,000)	GFC (1,300)	ODF (1,200)
1	GUJARAT	AHMEDABAD	12079	9579	1300	1200
2	MADHYA PRADESH	BHOPAL	12067	9567	1300	1200
