

DISTRICT INCOME ESTIMATES

Estimation of GDDP/ NDDP

Tamil Nadu

(Base Year - 2011-12)

2011-12 to 2022-23 (Provisional)

**DEPARTMENT OF ECONOMICS AND STATISTICS
CHENNAI – 600 006**

PREFACE

State Domestic Product is an important economic indicator that is used to measure the growth and the structural changes of the State economy. District Domestic Product or District income estimates is one of the core indicators which provide information on the economic status of the districts in the State.

These estimates help to assess the performance of different sectors in a district to understand the state of development across the regions and to identify the potential areas in the districts to achieve balanced regional development. The estimates of Gross and Net Domestic Product provides insight into the sectoral contribution to the district economy. District income is defined as the sum of the economic value of goods and services produced within the geographical boundaries of the district counted without duplication during a year.

This publication presents the District level estimation of the Gross Domestic Product and Net Domestic Product for Tamil Nadu for the years from 2011-12 to 2022-23 (Provisional). The estimates are compiled both at current and constant (2011-12) prices. The methodology used at the State level has been followed for district level estimation and depending on the level of the data availability certain indicators are used as proxies to allocate the State level estimates to the districts.

The estimates are provisional and are subject to revision. The sector-wise estimates of Gross District Domestic Product (GDDP) and Net District Domestic Product (NDDP) along with Per Capita Income have been presented in this report.

This brochure is expected to be of much use to Policy Makers, Administrators, Planners and Research Scholars for District Level Planning.

Date : 10.09.2024

THE METHODOLOGY FOR PREPARATION OF ESTIMATES OF DISTRICT DOMESTIC PRODUCT

General Methodology:

The availability of district-wise basic data required for estimation of income at the district level is essential for the computation of reliable estimates. The data in respect of commodity producing sectors viz., Primary Sectors and Manufacturing Sector, is fairly available but in respect of remaining sectors, it is very scanty. As such, wherever district-wise basic data are available, the same have been utilised to compute the District Income Estimates following the state level methodology. In case of non-commodity producing sectors, where district-wise basic data are not available, the state level estimates have been allocated to the districts on the basis of suitable district-wise indicators. Further, in some of the commodity producing sectors, though data on district-wise production are available, the corresponding prices are not available. In such cases District Income Estimates are compiled with district production and State prices. Similarly, wherever, certain ratios / norms, yield rates, etc. are used for the State Estimates and which are normally not available at the district level, the State level ratios / yield rates, etc. have been utilised for District Income Estimates also. Regarding Service Sectors, Income method is adopted in the State Estimates. The per head earnings based on Survey results are used in the estimates along with the workforce. As the per head earnings are not available at district level state per head earnings with the district workforce are used to arrive at the estimates of income at district level.

Broadly the methodology of computation of sectoral estimates is the same as adopted for estimates of State Domestic Product.

Agriculture

The district income estimates for the Agriculture sector is worked out using 'Production approach' method. Since, the district level data on production and prices for all the crops are not available uniformly, the estimation of Gross Value of Output of the crops are classified in to the following different categories:

-) Crops for which the district-wise Production are available and the corresponding district-wise prices are not available, the district-wise value of output are computed by using district-wise production and State prices. The wholesale prices of primary market during peak marketing period are taken.
-) Crops for which the district-wise data on Area is available, but the data on district-wise Production and Prices are not available, the district-wise value of output are worked out by allocating the State level value of output in proportion to the district-wise Area of the respective crop.

The district-wise Gross value of output of straws and stalks under the By-Products category is worked out by multiplying the district-wise area of the crop by the State level value per hectare of the respective crop.

Thus, the worked out district-wise Gross value of output of all crops under the groups of Cereals, Pulses, Oil seeds, Sugars, Fibers, Drugs & Narcotics, Condiments and Spices, Fruits & Vegetables and Other Miscellaneous Crops and the Gross value of output from the By-Products are summed up to obtain the district-wise total Gross value of output from Agriculture sector.

The various inputs to be deductible in this sector are i) Seed, ii) Organic Manure (Cattle and Buffalo dung), iii) Chemical Fertilizers, iv) Feed of Livestock from crop sector, v) Pesticides & Insecticides, vi) Diesel oil consumption, vii) Irrigation charges, viii) Market charges, ix) Repairs and Maintenance of fixed assets and other operational costs.

The district-wise values of these input items are worked out by distributing the State level estimates (arrived at independently under the current Series of State Income Estimates) to various districts on the basis of certain proportions for each input respectively.

For the Seed input, the district-wise values are obtained by allocating the State level estimates to districts based on the proportion of district-wise area of the crop. For Paddy, the state value per hectare and the district-wise area are used to arrive at the district-wise value of Paddy seed required. Also for the items such as Other Vegetables, Other Cereals, Fodder, Miscellaneous Non-Food crops and Total Condiments, the State level prices are multiplied with the

district-wise area and also for the items such as Other Pulses, Sunflower, Sweet Potato and Tapioca, the ratios given by CSO has been used to work out the value of Seed requirement.

For Dung input, the district-wise estimates as worked out in Livestock sector are used.

For the Chemical Fertilizers, the State level Prices are multiplied with the district-wise quantity of consumption obtained from the Agriculture Department.

For the Feed of Livestock from Crop Sector, the district-wise estimates of Feed of Consumption of Cattle and Buffalo as worked out in Livestock sector are used.

For Pesticides and Insecticides, the State level prices are multiplied with the district-wise consumption of pesticides obtained from the Agriculture Department.

For Diesel Oil Consumption, the State level values of consumption of diesel oil by tractors and oil engines are distributed to districts in proportion to the district-wise number of tractors and oil engines used for irrigation purpose. The district-wise number of tractors is obtained from Transport Department and the district-wise number of Oil engines is calculated using Livestock Census 2012 and 2019.

For Irrigation Charges, the State level value is distributed to the districts in proportion to the district-wise Gross area irrigated by Government canals.

For Market Charges, the State level ratio is followed for obtaining the district-wise values of Market Charges.

For Repairs and Maintenance, the State level value is distributed among the districts in proportion to the Gross Value of Output.

The State level value on Government Irrigation System is distributed among the districts in proportion to the district-wise total area irrigated by Government canals.

The district-wise Gross Value Added (GVA) from Agriculture Sector is arrived by deducting the district-wise values of all inputs from the district-wise Gross Value of Output and adding the district-wise operations of Government Irrigation System.

2. Livestock

The District Income Estimates for the Livestock sector is worked out using the “Production Approach” Method as in the case of State Income Estimates. The district-wise values of Gross value of output for the Livestock sector is obtained by adding the Gross value of output of the following main components like Milk, Egg, Wool & Hair, Dung Group, Silkworm, Honey, Meat group including Meat By-Products and Incremental in Livestock. The estimation of the district-wise Gross Value of Output for the above components is worked out as follows.

The district level data on the production of Cow milk, Buffalo milk and Goat milk obtained from the Integrated Sample Survey (ISS) Report of the Department of Animal Husbandry & Veterinary Sciences, Tamil Nadu and the State level Prices are used to work-out the Gross value of output of Milk group.

The district level data on the Egg and wool production obtained from the Integrated Sample Survey (ISS) Report of the Department of Animal Husbandry & Veterinary Sciences, Tamil Nadu and the State level Price of Egg and wool are used to arrive at the district-wise value of output for Egg and wool.

For the Goat Hair and Pig Bristles, the State level prices with the relevant district-wise Livestock Population worked out from the results of the two latest Indian Livestock Census 2012 & 2019 are used to obtain the district-wise value of output.

Under the dung group, the utilization rate for dung cake and dung manure as given in the Integrated Sample Survey (ISS) Report, the district-wise Livestock Population for Cattle, Buffalo, Sheep and Goat and the State level prices, are used to work out the district-wise value of output.

The district-wise Cocoons production and State level price of Cocoons from Central Silk Board, Bangalore has been used to estimate the district-wise Gross value of output of Silkworm. District-wise Honey Production and State level price of Honey obtained from Khadi & Village Industries Commission, Chennai has been used to estimate the district-wise Gross value of output of Honey. Under the Meat group, the district-wise Gross value of output is worked out using the district-wise data on the estimated meat production and the estimated number of slaughtered animals in the registered slaughter houses and in the un-registered slaughter houses obtained from the Integrated Sample Survey (ISS) Report and the State level prices.

The rates and ratios supplied by CSO for the meat products and meat by-products in proportion to the meat production, are used to work out the district-wise Gross value of output for the meat products such as Edible Offal's & Glands, Heads & Legs, Fat from slaughtered animals and meat by-products of animals like Cow, Buffalo, Sheep, Goat and Pig

The State value of Hides & Skin of Cattle, Buffalo, Sheep and Goat is distributed among districts in proportion to the district-wise number of Slaughtered animals as given in the ISS report. The mortality yield rates for Cattle and Buffalo as given by CSO, the district-wise Livestock Population worked out from the results of the two latest Indian Livestock Census 2012 & 2019 and the State level prices, are used to work out the Gross Value of Output of Fat from Dead and Fallen animals. State level value of output for Poultry Meat is distributed among districts in proportion to the district-wise Poultry Population worked out from the results of the two latest Indian Livestock Census 2012 & 2019. The State level value of output for the Incremental in Livestock such as Cow, Buffalo, Sheep, Goat, Pig and Poultry is distributed among districts in proportion to the district-wise Livestock Population worked out from the results of the two latest Indian Livestock Census 2012 & 2019.

3. Forestry and Logging

The District Income Estimates for the Forestry and Logging sector is worked out as in the case of State Income Estimates for the three main components namely Industrial wood, Fuel wood consumption and Minor Forest Products.

The State level estimates of the Gross value output of the Industrial wood are distributed among the districts in proportion to the district-wise area of Forest obtained from the Season and Crop Report.

The State level estimates of Fuel wood consumption is distributed to the districts in proportion to the district-wise Rural and Urban Population projections based on 2011 Census respectively. The Net value of Fuel wood consumption for Household sector is obtained by subtracting the district-wise total value of Agricultural By-Products used as Firewood from the total value of Fuel wood consumption. The Net value of Fuel wood consumption for Non-Household sector is obtained by using the State level ratio supplied by CSO, New Delhi.

The State level estimates of Gross value of output of Minor Forest Products are allocated to the districts in proportion to the district-wise forest area. The State level ratio is utilized for working out the district-wise estimates of repair, maintenance and other operational costs.

4. Fishing

The District Income Estimates for the Fishing sector is worked out using the “Production Approach” Method as in the case of State Income Estimates. In the case of Marine fishing, the district-wise value of output is worked out by multiplying the district-wise production and State level prices. Similar procedure is followed in working out district-wise value of output of inland fish also. The district-wise production of marine and inland fish is obtained from the State Fisheries Department, Chennai. To work out the value of subsistence fish and operational costs including repairs and maintenance, the State level rates/ratios is used for district income estimates also.

5. Mining and Quarrying

The District Income Estimates for the Mining & Quarrying sector is worked out using the “Production Approach” Method as in the case of State Income Estimates. The district-wise values of output for this sector are worked out by summing up the values of the components namely Major Minerals and Minor Minerals.

The district-wise Major Minerals Production and the Seigniorage fee realized are obtained from the Department of Geology and Mining, Chennai to allocate the State level estimates to districts. The district-wise production of Salt-evaporated and the value of output are obtained from the O/o the Deputy Commissioner of Salt, Chennai. The district-wise Gross Value Added for the Salt is obtained by multiplying the district-wise value of output with the State level ratio as given by CSO, New Delhi. District-wise Minor Minerals data obtained from the State Geology and Mining Department is used to allocate the State level estimates to districts. The State level ratio supplied by CSO is used to arrive at the district-wise Gross Value Added for Sand.

6. Manufacturing

The district-wise estimates of value added from organized manufacturing sector as available from Annual Survey of Industries (A.S.I.) is used to distribute the State Gross Value Added to districts for the organized sector while the district-wise estimated workforce based on the 2011 and 2001 Censuses are used for the unorganised sector.

7. Electricity, Gas and Water Supply

District-wise workforce available for electricity is used to distribute the Gross Value Added for Electricity sector while the district-wise workforce available for water supply is used for Water supply sector.

State level value added from Bio-Gas is distributed according to number of Bio-Gas Plants in each district. For remaining gas sector, the State level estimates are allocated to the districts on the basis of workforce.

8. Construction

For public sector the estimates of State GVA are allocated to the districts on the basis of workforce. For household sector the number of rural and urban residential buildings as per census 2011 are used to distribute the State GVA of the rural and urban residential households while projected workforce estimates as per census 2011 is used for other private subsectors.

9. Transport, Storage and Communication

Under the Railways, the State level estimates are allocated to districts in proportion to the workforce engaged in Railways at district level. For Transports by Other Means, in respect of Road Transport the value added is allocated to districts on the basis of district-wise number of vehicles while in respect of water and Air transport the State level estimates are allocated to the districts in proportion to the workforce.

For Storage sector, the district wise occupancy details of the State warehousing corporation and the Central warehousing corporation are used for allocating the state level estimates to the districts in respect of the public sector while for the private sector state level estimates are allocated to districts on the basis of workforce.

The State GVA for Communication is allocated to districts in proportion to the workforce.

10. Trade, Hotels and Restaurants

State Domestic Product relating to trade sector is allocated to districts on the basis of district-wise workforce.

11. Banking and Insurance

The state income value added of this sector is allocated to the districts on the basis of district-wise bank deposits as available in the Reserve Bank of India publication.

12. Real Estate, Ownership of Dwellings and Business Services

As the data on per head earnings of this sector at district level is not available State's per head earnings are used along with district workforce to arrive at District Income Estimates. State level estimates are allocated to districts in proportion to number of dwellings (Rural / Urban) in each district based on census data.

13. Public Administration

The state GVA of this sector are allocated to the districts in proportion of the number of employees in respect of the State Government administration.

14. Other Services

State level estimates are allocated to districts on the basis of public sector workforce. State level estimates are allocated to the districts on the basis of Private Sector workforce which are obtained by deducting Public Sector workforce from census workforce engaged in these activities.

The Workforce data has been released in the Census 2011 recently and therefore NIC code classification and categories has been updated accordingly. CSO has incorporated certain methodological changes in the estimation procedure for certain sectors in the new series with base 2011-12. The changes have been incorporated both at State level and at district level estimation. The district level data available has been used for the estimation to the fullest extent based on the guidelines and the methodology given by CSO, GOI.

Financial Intermediation Services Indirectly Measured (FISIM):

The data as given for the State by Central Statistics Office is allocated to districts on the basis of Gross Value of Output / Gross Value Added of the Districts.

Consumption of fixed capital:

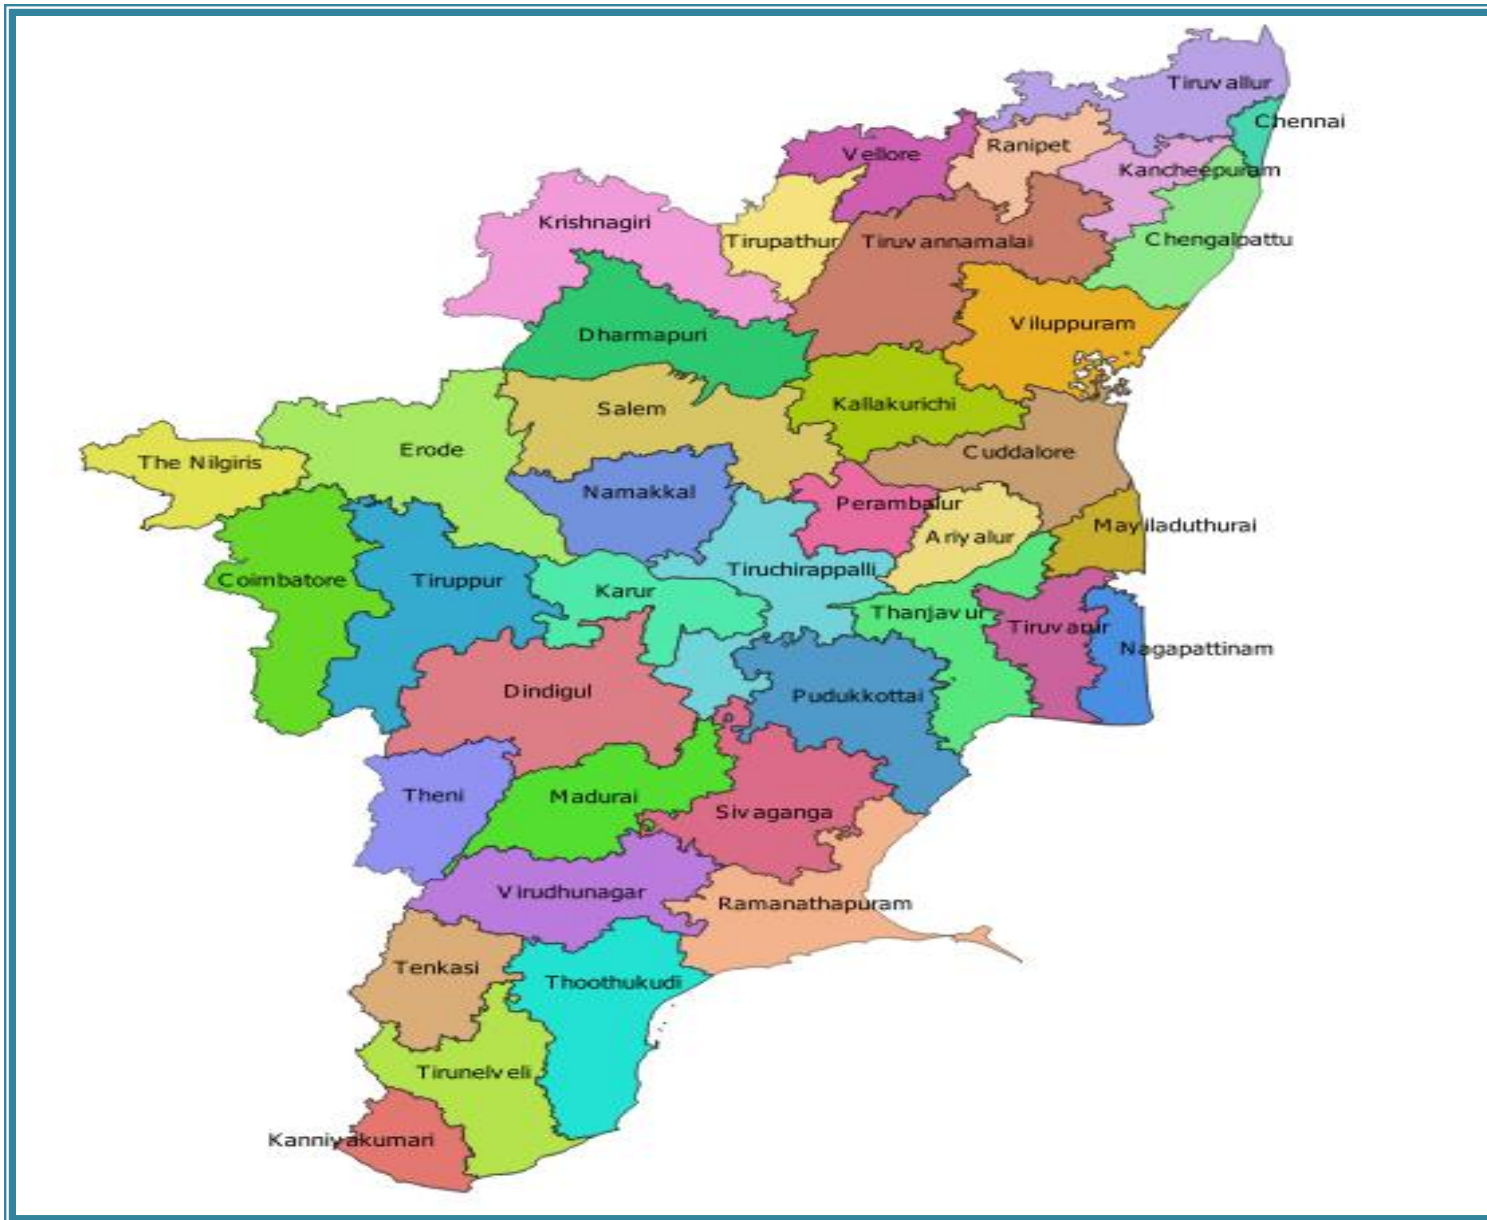

Sector-wise ratio of consumption of fixed capital to Gross value added is adopted for the district level estimates.

Estimates at Constant Prices:

The methodology for working out estimates at Constant (2011-12) Prices is more or less the same as that for Current Prices in the sectors of Agriculture, Livestock, Forestry and Logging, Fishing, Mining and Quarrying, Manufacturing, Construction, Real Estate, Ownership of dwellings and Business Services, Trade, Hotels and Restaurants. In the sectors where estimates are worked out by 'Production approach' the current year production are evaluated on the basis of base year (2011-12) prices to obtain the value of output at 2011-12 prices.

For the remaining sectors, the District Income estimates at Constant (2011-12) Prices are worked out using the state level deflator of Current to Constant Prices.
