No. PCB/074/STP/2012 4975

Dt: 0 5 DEC 2015

Directions Under Section 33(A) of the Water (Prevention and Control of Pollution)Act,1974 regarding treatment and utilization of sewage

Sub.: Compliance with the Provisions of the Water (Prevention & Control of Pollution) Act, 1974

Ref.:

(1) CPCB direction No. A-19014/43/06-MON/709 Dt. 21.08.2015

(2) Proceedings of 199th Board meeting held on 8.9.2015

Whereas, amongst others under Section 17 of the Water (Prevention and Control of Pollution) Act 1974, one of the functions of State Pollution Control Board (SPCB), Constituted under the Water (Prevention and Control of Pollution) Act,1974 is to plan a comprehensive programme for prevention, control or abatement of pollution of streams and wells in the state and to secure the execution thereof. The State Pollution Control Board under section-17(g) of the Water (Prevention and Control of Pollution) Act, 1974 has been mandated with responsibility to lay down, modify or annul effluent standards for the sewage and trade effluents and the quality of receiving waters (not being water in an inter-state stream) resulting from the discharge of effluents and to classify waters of the state;

Whereas, the single major source of water resources, are being deteriorated by sewage which contributes to 70% of the pollution load to water bodies and rest is from agricultural runoff and industries. Consumption of polluted water has adverse impact on human health and aquatic life;

Whereas, water quality monitoring results of rivers in Karnataka indicated that water quality has been affected at various stretches because of disposal of untreated or partially treated sewage into the water bodies and as a result, there are high number of fecal coliform bacteria making the water body unfit for human consumption or for other uses;

Whereas, in the state of Karnataka out of 219 local bodies only 55 Sewage Treatment Plants are functional to treat the effluent:

Whereas, the cities and towns are not having adequate system for sewage collection and its treatment and thus entire waste water either joins rivers or lakes or remains inundated on land causing potential risk to the ground water contamination;

The CPCB realizing that the river and water bodies have been polluted and to prevent further deterioration of surface, subsurface & coastal water has issued directions under sec. 18(1)(b) of The Water (Prevention and Control of Pollution) Act, 1974 to the KSPCB to comply with following;

- 1. State Pollution Control Board shall make mandatory for local/urban bodies to set up a sewerage system for sewage collection, underground conveyance, treatment and its disposal to cover the entire local/urban area to bridge the widening treatment gap long with enforcement of consent management in line with standards for sewage treatment (Annexure-I)
- 2. SPCB/PCC shall issue directions to all municipalities and other concerned authorities in the State/UT responsible for treatment and disposal of sewage

The matter was deliberated in 199th Board meeting held on 08.09.2015. It is mandatory for KSPCB to comply with the direction issued under sec. 18(1)(b) of The Water (Prevention and Control of Pollution) Act, 1974. Hence, the following directions under section 33(A) of The water (Prevention and control of Pollution) 1974. Hence following directions are hereby issued for compliance:

All the municipalities and other concerned authorities in the Karnataka responsible for treatment and disposal of sewage shall treat and dispose sewage to following effect

- I) The existing STPs which are being operated before issuance of these directions shall meet the revised standards as per Annexure I within two years from the date of issuance of these directions.
- II) Local bodies which does not process consent shall seek consent under Water (Prevention and Control of Pollution) Act,1974 from the KSPCB within a period of 60 days.
- III) Secondary treated sewage should be mandatorily sold for use for non-potable purposes such as industrial purposes, railways and bus cleaning, flushing of toilets through dual piping, horticulture and irrigation. No potable water to be allowed for such activities. They will also digest methane for captive power generation to further improve viability of STPs.

- IV) Local bodies shall enforce dual piping system in new housing constructions for use of treated sewage for flushing purpose.
- V) The municipal authority and the concerned authority shall submit a time bound action plan for setting up sewerage system covering proper collection, treatment and disposal of sewage generated in the local/urban area and such plan shall be submitted by the Municipal Authority to the State Board within a period of 90 days so as to treat the sewage tot he standard given in Annexure-I.
- VI) The new sewage treatment plants which will come into existence after the issuance of these directions shall be designed to treat and achieve standards given in Annexure-I.

The recipient of this direction shall acknowledge the receipt of these direction within 10 days and shall Communicate the status on the actions taken to achieve within 30 days informing the status of consents along with the action plan for treatment and disposal of sewage
