## **PREFACE**

“Crime Review - Tamil Nadu – 2013” is an annual publication brought out by the State Crime Records Bureau, Tamil Nadu based largely on the pattern of “ Crime in India” published by the National Crime Records Bureau.

With a view to making the Crime Review–Tamil Nadu more comprehensive and informative additional information on emerging and new types of crimes is added year after year. In the present issue we have added a new Chapter on incidence of crimes in Banks & ATMs.

Needless to say, “Crime Review Tamil Nadu – 2013”, offers a mine of information on crimes and will serve as a useful compendium for Police Officers in the field as well as for research scholars and criminologists.

I record my appreciation of the excellent work done by officers and staff of State Crime Records Bureau, Tamil Nadu, for preparing this report.

# CHAPTER 1

## INCIDENCE AND RATE OF COGNIZABLE CRIMES IN TAMIL NADU

### Introduction

The Criminal Procedure Code (Cr.PC.) divides all the crimes into two categories:

- (i) Cognizable - Sec.2(c) Cr.PC
- (ii) Non-cognizable - Sec.2(l) Cr.PC

### Cognizable Crimes

A cognizable offence or case is defined as the one which an officer in-charge of a police station may investigate without the order of a magistrate and effect arrest without warrant. The police have a direct responsibility to take immediate action on the receipt of a complaint or of credible information in such crimes, visit the scene of crime, investigate the facts, apprehend the offender and arraign him before a court of law having jurisdiction over the matter. Cognizable crimes are broadly categorized as those falling either under the 'Indian Penal Code (IPC)' or under the 'Special and Local Laws (SLL)'.

### Non-Cognizable Offence

Non-Cognizable crimes are defined as those which cannot be investigated by police without the order of a competent magistrate. Police does not initiate investigation in non-cognizable crimes except with magisterial permission. First schedule of the Cr.PC. gives the classification of offences under IPC into cognizable & non-cognizable categories.

The various crimes that are being registered and investigated by different law enforcement agencies are broadly grouped under the following categories for Statistical Information System.

## Population

Estimated population is used for calculating crime rate (i.e. number of crimes per one lakh of population). The estimated population of the state for the year 2013 is 744.07 lakhs. Population of the state in the decade (2003 - 2013) has increased by 17.73% with an annual exponential growth rate of 2.82%.

## Complaints Received by Police

The total number of complaints received by police whether oral, written, distress call or the ones initiated suo-moto by police have been collected since 2003 in order to assess

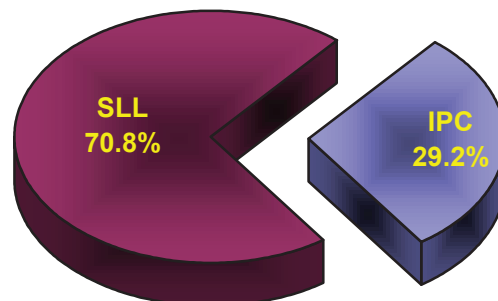

the quantum of work load of police. The year-wise number of such complaints *vis-à-vis* actual number of cognizable crimes registered by Police are presented in [Table-1.1](#).

## No. of Complaints Received

6,96,678 complaints were received by all Police Stations in 2013 as compared to 7,49,538 complaints received during 2012 representing decrease of 52,860 (7.05%) over 2012. 56,066 (8.05%) were oral complaints, 3,52,470 (50.59%) were written complaints, 3,066 (0.44%) was distress calls reported over phones (No.100) and 2,85,076 (40.92%)

complaints were initiated by Police. It is observed that all these complaints were registered as cognizable offences with 2,03,579 under IPC and the remaining 4,93,099 under SLL. Chennai City (1,49,678) received maximum number of complaints whereas The Nilgiris (2,262) received the least. Dist/City-wise Incidence of IPC+SLL Crime shown in [Map-1.1](#).

**Crime Incidence (IPC + SLL)  
(Incidence...6, 96,678)**

Total incidence of crime gives an absolute picture of the crime situation in the state or the district. Comparative figures over a period of time indicate an increase or decrease in the incidence of crime requiring appropriate crime control efforts by the district police.

*IPC crimes reported a fast pace of growth rate of 23.10% as compared to the lower growth rate of population 17.73% in the decade (Table-1.2).*

**Crime Rate (IPC + SLL)  
(Crime Rate...936.30)**

Population is one of the important factors influencing incidence of crime. A positive correlation between the growth in incidence of crime and the population of the state has been observed. A number of socio-economic factors, besides population, could influence the crime situation at a particular place. The present analysis of crime rate is restricted to the influence of population only, therefore, the analysis of crime rate of a particular District/City shouldn't be construed as the sole indicator of crime

position of that particular district/city in relation to others.

*The crime rate defined as the 'number of crimes' per one lakh population is universally taken as a realistic indicator since it balances the effect of growth in population. The rate of total cognizable crimes in the State showed a decreasing trend during 2013 (from 1024.07 to 936.30) over the year 2012. The crime rate in respect of IPC crimes has marginally decreased from 273.9 in 2012 to 273.6 in 2013 and that for SLL crimes has decreased from 750.2 in 2012 to 662.70 in 2013.*

**Crime Incidence- IPC  
(Incidence...2, 03,579)**

A total of 2, 03,579 IPC crimes were reported in the state during the year 2013 against 2,00,474 in 2012 recording an increase of 1.5% in 2013 which can be attributed to increase in the incidence of crimes under all major heads, namely Attempt to commit murder, Rape, preparation & Assembly for Dacoity, Robbery, Burglary, Cheating, Dowry Deaths, Cruelty by Husband and Other IPC Crimes. Rise in population, truancy, unemployment etc. are some of the major reasons for this

rising pattern of crime. Coimbatore City, Chennai City and Tirunelveli registered more than 10,000 cases.

The Cities / Districts have registered more than 10,000 cases accounted for about 22.62% of total crimes reported in the state during 2013.

**Crime Rate - IPC  
(Crime rate...273.60)**

Dist/City-wise Crime Rate is shown in Table-1.8 & Map-1.2. Average IPC Crime Rate for 2013 is 273.60 whereas the same for 2012 was 273.90. The IPC crime rate has increased by 4.56% during the decade 2003-2013 from 261.67 in 2003 to 273.60 in 2013.

## CHAPTER 11 MISSING PERSONS

1. **Table 11.1** depicts district/city-wise number of persons missing and traced for 2013. 76.06% of (7362 out of 9679) missing persons during the year were traced. 2317 persons, including 439 children remained missing at the end of the year. 87.18% of (1754 out of 2012) missing girl children were traced. (**Chart-11.1**)

2. An analysis of the reasons for missing has been made from the available statistics of traced persons. **Table 11.2** depicts district/city-wise reasons for persons missing and traced for 2013. A large majority of persons traced (37.10%) left home due to love affair, 34.98% of the traced ran away from home due to family quarrel/ parents scold. 67.67% of these kidnapped/abducted persons were minor girls while adult women accounted for 25.56%.

3. A large number of students (560) ran away from home due to failure in examinations and were subsequently traced. Persons killed on road accidents accounted for 28 (0.38%) out of traced missing persons. 61 missing persons were found murdered. 54 of these are adults and 7 are children. 0.37% of persons (27), committed suicide by adults only.

4. 54 of the traced persons had left home for seeking employment. 21 of them (38.89%) were children.

5. The fate of 2317 missing persons, including 439 children, is not known. This requires further analysis.

6. It has been established that publicity plays a major role in tracing large number of missing persons. Conversely, it is seen that adequate publicity was lacking in many unsolved cases.

**CHART - 11.1**  
**MISSING & TRACED PERSONS - 2013**

7. An official procedure exists for consolidating information on missing persons at the State level and to give publicity, both through official and private media. Modus Operandi Bureau gets reports of cases of all missing persons and also arranges for publishing the details of the missing persons in the Weekly Criminal Intelligence Gazette. This Gazette is circulated to all the Police stations of the State and is also sent to the CIDs of other States and Superintendents of Police of Districts and Commissionerates of bordering States.

8. The system, prima facie, appears adequate; however, some test checks have revealed that the police stations simply fail to pass on the information in a large number of cases. In many instances, information is too sketchy to be of any help. In many cases, even the photographs of the missing persons are not available. The success rate of such lackadaisical efforts is, understandably, low. Even in cases where missing persons, particularly children, are traced or recovered, Police fail to connect them to the complaint lodged in another Police station.

9. The obligation of a prompt and thorough enquiry into cases of missing persons is accentuated by the fact that delay in tracing a lost girl/child greatly increases the possibility of their landing in unscrupulous hands which can be disastrous for their future. Prompt tracing mechanism, thus, acts as a preventive measure.

10. This problem has been identified in the state and efforts have been taken to streamline the investigations for missing persons. These include sensitizing Police officers to the importance of the issue, laying down guidelines for a systematic investigation and ensuring proper supervision and monitoring of

such cases. Arrangements for training the investigating officer at the Police Training College, Chennai are on and a training module has been finalized.

11. Special Cells have been constituted at two levels – districts and Ranges – which have been entrusted with the task of supervising the investigations into cases of missing persons and monitoring their progress.

12. A comprehensive proforma in three parts has been prescribed at the level of the investigating officers. The investigating officer who receives the complaint has to fill-up the first portion of the questionnaire. The questionnaire includes important details of the missing person including photographs. There are instances where photographs are not available, or they are old. The investigating officer, under such circumstances is required to use the portrait building system, which can generate a good image of the missing person. This system is available at all police district headquarters in the State. Part two of the proforma comprises investigative efforts undertaken after the receipt of the complaint. This can be updated by filling in details of the day-to-day efforts taken. The third and the final part of the proforma deals with wrapping up the case once detected.

13. Modus Operandi Bureau is required to maintain a statewide database of missing persons and is expected to provide important investigative inputs to the investigating officers. Police Computer Wing is hosting the details of missing persons on the Tamil Nadu Police website.

14. These measures, if implemented in true spirit, will certainly have a positive impact on the police performance in this important area of public concern.

## CHAPTER 12

### HUMAN TRAFFICKING

Human trafficking is a group of crimes involving the exploitation of men, women and children for financial gains which is violation of fundamental human rights. Victims are lured or abducted from their homes and subsequently forced to work against their wishes through various means in various establishments, indulge in prostitution or subjected to various types of indignities and even killed or incapacitated for the purposes of begging and trade in human organs.

This Bureau is collecting data under the following heads of crime which are related to human trafficking. IPC Crimes

- (i) Procurement of minor girls (section 366-A IPC)
- (ii) Importation of girls ((Sec. 366-B IPC)
- (iii) Selling of girls for prostitution (Section-372 IPC)
- (iv) Buying of girls for prostitution (Section -373 IPC) SLL Crimes
- (v) Immoral Trafficking (Prevention) Act 1956

**Cases under following legislations also form part of offences under human trafficking but NCRB is not collecting data specifically relating to these acts.**

- (i) Bonded Labour System (Abolition) Act 1976
- (ii) Juvenile Justice (Care and Protection of Children) Act 2000
- (iii) Child Labour (Prohibition and Regulation) Act 1986
- (iv) Transplantation of Human Organs Act 1994

#### **Immoral Traffic (Prevention) Act, 1956:**

Section 5 of Immoral Traffic (Prevention) Act, 1956 (ITPA) deals

with punishment for procuring, inducing and taking (person) for the sake of prostitution. ITPA is being rigorously enforced to ensure prevention of exploitation of women and children. Larger emphasis is now being paid on trafficking of human beings as against the erstwhile practice of concentrating on detention of sex workers. The number of cases under section 5 ITP Act has increased by 9.80% in 2013 compared to 2012.

#### **Human Trafficking in Tamil Nadu:**

Government of Tamil Nadu has established an **Anti-Trafficking Cell** in the Crime Branch CID to combat trafficking in women and children. This Cell is empowered with inter-state jurisdiction in dealing with trafficking of women and children. An anti-Vice Squad is functioning in Greater Chennai, dealing with these issues with larger attention to nail the traffickers.

Cases registered under section 8 ITP Act (soliciting in public) have come down as a natural consequence to the shift in emphasis on traffickers. Most of the cases now have been registered against pimps, brothel owners and traffickers under 3, 4, 5, 6 & 7 of ITP Act.

549 cases have been registered under the Immoral Traffic (Prevention) Act (**Table-12.1**) in 2013. Chennai City registered the highest (264), followed by Coimbatore City (36), Madurai City (34), Vellore (15). Other districts registered less than 15 cases.

## CHAPTER 15-A INCIDENCE OF CRIMES AT BANKs & ATMs

The proliferation of banks in a growing economy has brought with it corresponding increase in the incidence of banks and ATM related offences. Though, traditionally, banks have always been targeted by criminals, incidences have been largely confined to the urban centers in the cities and towns. The growth of the economy has resulted in increased demand for finances and loans in semi-urban and rural areas which has consequentially led to provision of extension services by national, commercial and co-operatives banks in these areas. However, due to its vast geographical spread and relatively isolated locations, coupled with the lack of commensurate security and safety, these banks have become easy targets for criminals who operate with relative impunity. Related to bank thefts are offences committed in ATMs which has also shown a substantial increase in the last couple of years as ATMs have gradually penetrated into smaller towns and villages and have gained popularity and acceptance as a viable alternative to traditional methods of cash withdrawals and deposits.

Although bank and ATM thefts constitute only a small fraction of all other types of thefts, its exponential increase in recent years especially in semi urban and rural areas is a cause for concern and pose a huge challenge for the police and the banking services in devising effective strategy for dealing with the problem. The objective of this exercise is to present a statistical profile of the incidence of banks and ATMs thefts in recent years to help both the police and the banks to understand the magnitude of the problem and chalk out appropriate

crime preventive measures in arresting the increasing trend of banks and ATM thefts.

The incidence of crimes at Banks and ATMs from the year 2009 to 2013 is presented in [Chart 15A-1](#) and [Table-15A-1](#).
