

Subject:- Repairing road cuts within Corporation limits and about management of corporation properties.

Currently road-cutting permission for water supply, drainage and electricity connection to buildings is being given by respective Sub Divisional Office in 8 Zones of the Corporation.

However, there is a delay in bringing these road-cuts back to earlier condition and this is causing inconvenience to public and smooth movement of traffic.

In view of the above factors, power has been delegated to the Zonal Joint Commissioner/Deputy Commissioner to take action to repair the cut sections of the road as soon as possible as per the specific description (as per IRC: 98-1997).

In this regard, ward wise road cutting is allowed and road fee is collected. In order to repair the cut sections of the road, necessary actions to be taken to use the fee collected for this purpose.

The necessary administrative approval for this process is to be given not exceeding the amount charged in granting permission to cut the road. Zonal Works Department Officers to take necessary action to repair the road cuts as per specification (IRC: 98-1997)

In addition to this, it has been suggested that, from the ward grant (POW), the grant earmarked for emergency works should be used to close potholes and maintenance of corporation buildings in good condition.
